Weekly

BREXIT WATCH

Week 44

November 2017

Brexit Watch - Week 44

The weekly Brexit Watch report monitors the short-term UK macro economic indicators to assess the impact of the referendum vote and the subsequent triggering of Article 50 on UK economy. The report also monitors indicators in 4 manufacturing industries, namely, Electrical (SIC 27), Electronic (SIC 26), Mechanical (SIC 28) and Fabricated Metals (SIC 25).

The emphasis of this report is to monitor what has happened as opposed to what will happen. All the data with exception to exchange rates and OECD Composite indicator come from the Office for National Statistics (ONS).

To make it easy to differentiate between trends before and after the referendum vote, each chart has a vertical purple line which marks 23rd of June 2016, the date of the referendum.

The main points at the end of week 44 in 2017 are as follows:

- ★ The month-to-date average of **Sterling** with **US Dollar** in week 44 fell by 0.2% compared to October 2017 average, but was up by 6.0% compared to November 2016.
- **Input prices** increased by 8.4% in September 2017 compared to a year earlier.
- **Consumer price index** grew by 3.0% in the twelve months to August 2017, driven by rising prices for food and recreational goods.
- **Index of services** grew by 0.2% between July and August 2017 and also grew by 1.6% in the twelve months to August 2017.
- The first estimate of UK **GDP** growth in the third quarter of 2017 was 0.4%; equivalent to £488.9 billion and a growth of 1.5% compared to 2016 Q3.
- **Unemployment** rate remained at 4.3% in the three months to August 2017; the lowest rate since May 1975.
- **Retail sales volume** grew by 1.2% in the twelve months to September 2017.
- **Business investment** for all industries in 2017 Q2 was revised to 2.5% compared to a year earlier.
- **Exports** trade in **value** grew by 9.8% in August 2017 to £50.2 billion compared to twelve months earlier and **imports** also grew by 7.4% to £55.8 billion in the same period.
- The **construction output**, at constant prices, rose by 3.5% to £12.8 billion in August 2017 compared twelve months earlier.
- Combined **turnover** of the four monitored manufacturing industries grew by 1.2% in August 2017 and 6.1% compared to twelve months earlier. In the 12-month to August 2017, turnover of **Electrical** sector grew by 8.4%, both **Electronics** and **Mechanical** grew by 7.3% and **Fabricated Metals** sector grew by 3.5%.

1 Exchange Rates & Stock Market

The month-to-date average of the Sterling exchange rate with **US Dollar** at the end of week 44 of 2017 decreased by 0.2% compared to October 2017 average, but increased by 6.0% compared to a year earlier. It closed at 1.3109/GBP at the end of week 44. The USD rate is now 9.4% below May 2016 (pre-brexit vote) level.

The month-to-date average rate for the **Euro** at the end of 2017 week 44 grew by 0.8% compared to October 2017 average but fell by 1.7% compare to a year earlier. It closed at 1.1246/GBP at the end of week 44. The Euro rate is now 12.0% lower compared to May 2016.

The stock market, **FTSE 100**, closed at a record high at the end of week 44, finishing at 7,560 points.

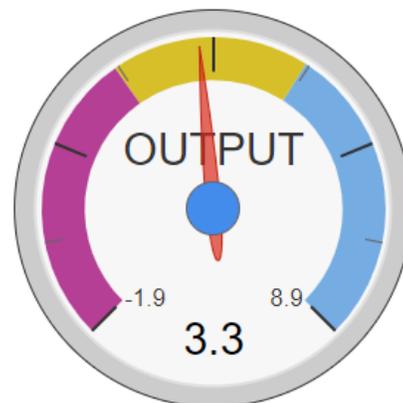

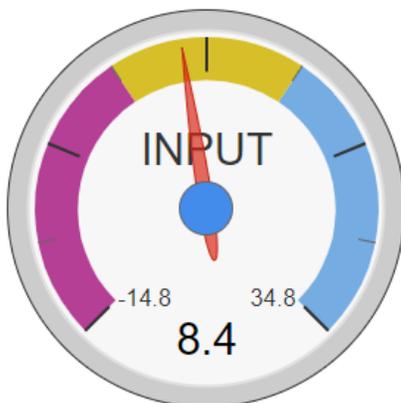

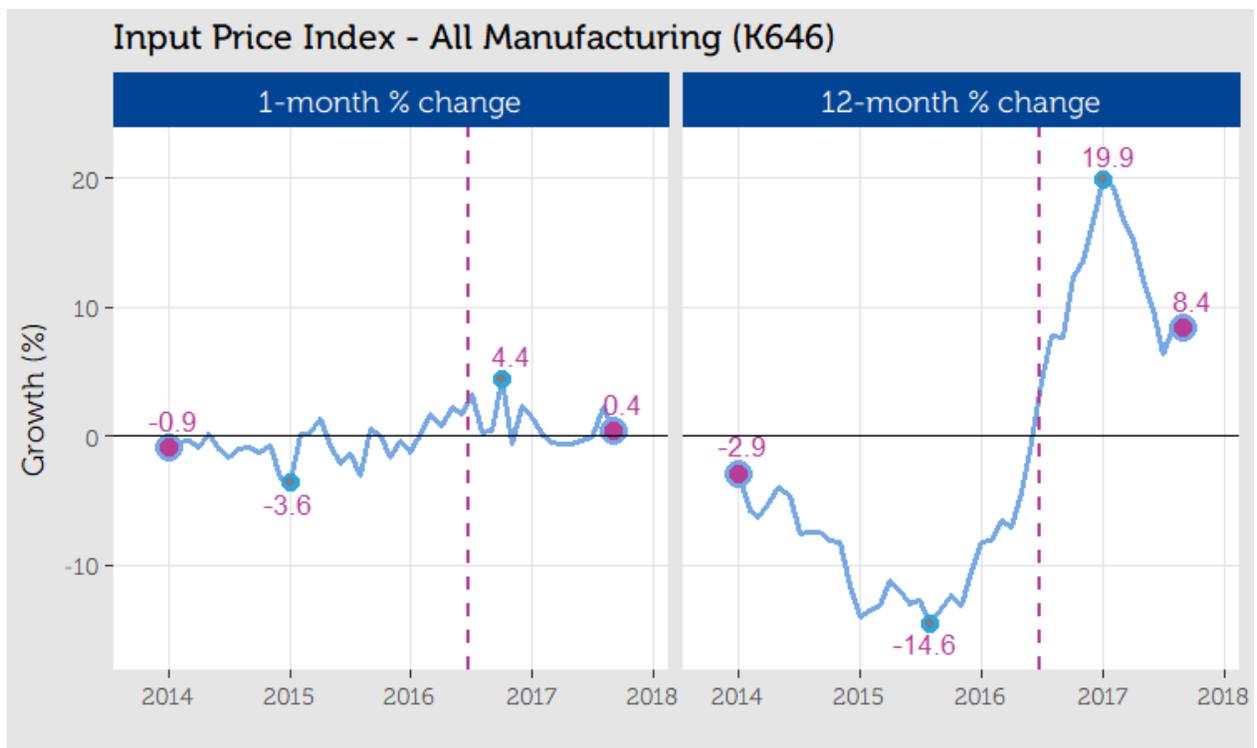

[Gauge charts: Daily exchange rates since January 1999 / Stock chart is since records began]

2 Producer Prices

The **input price** index for all manufacturing grew by 0.4% between August and September 2017 and also grew by 8.4% compared to September 2016. Upward contributions from energy were offset by downward contributions from other industries, resulting in little change in the annual rates. It is the 15th successive year on year growth.

Factory gate (Output) prices for all manufacturing rose by 0.2% between August and September 2017 and also by 3.3% compared to September 2017.

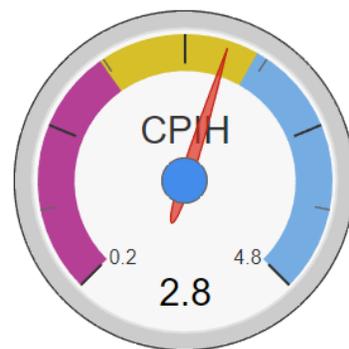

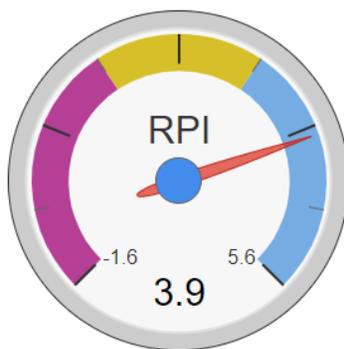

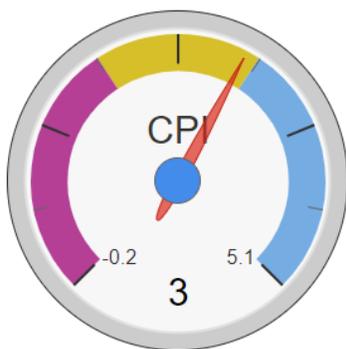

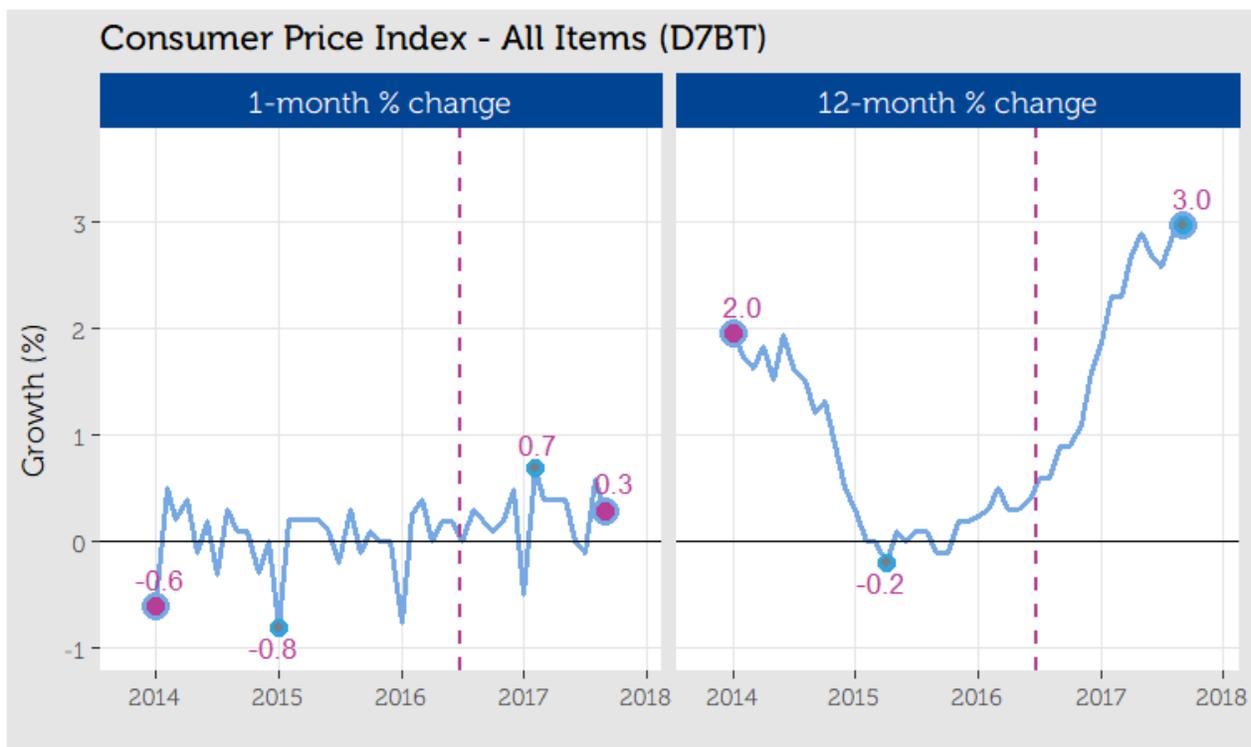

[Gauge Charts: 12-month % change since Jan 2000, INPUT = Input price, OUPUT=Factory gate prices]

3 Consumer Prices

Consumer price index grew by 0.3% between August and September 2017, and the 12-month growth reached 3.0%. The main contributors to the increase in the rate were rising prices for food and recreational goods, along with transport costs, which fell by less than they did a year ago. It is the 23rd successive year on year growth and the highest 12-month growth since April 2012.

The **retail price index** grew by 0.1% between August and September 2017, and by 3.9% compare to a year earlier. It is the 95th successive year on year growth.

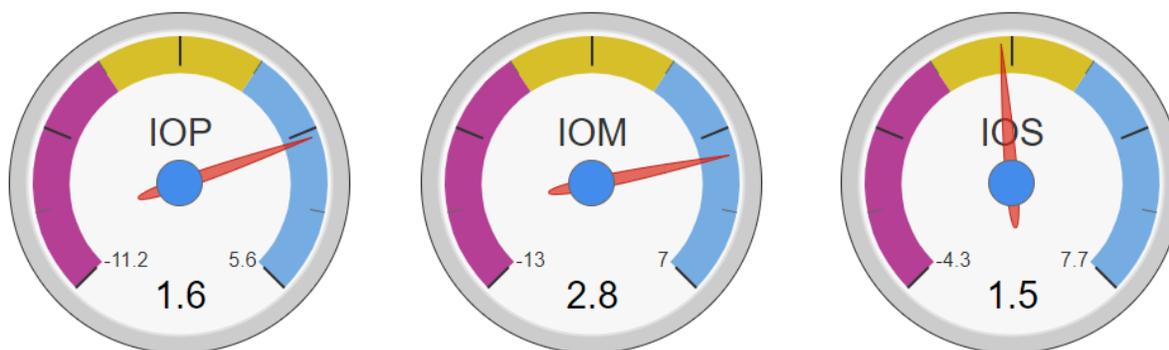

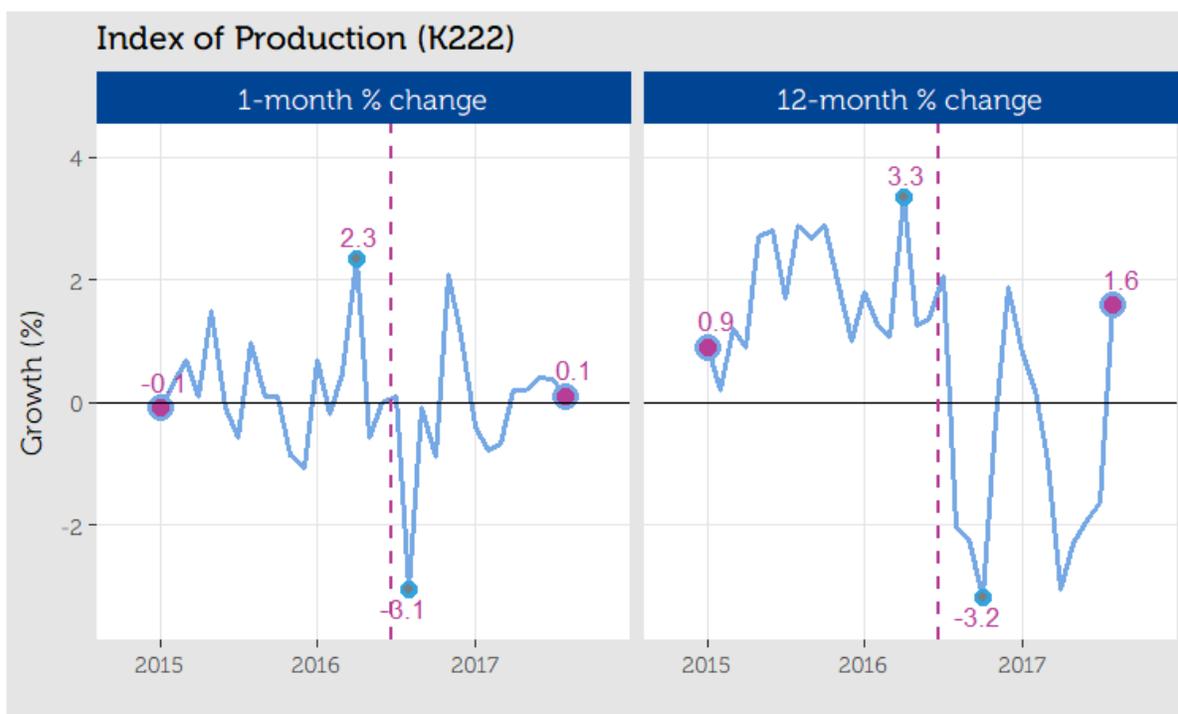

[Gauge Charts: 12-month % change since Jan 2000; CPIH data starts from Jan 2005]

4 Production

Index of production (IOP), the production output at constant prices, grew by 0.1% in August 2017 compared to July 2017 and also grew by 1.6% compared to twelve months earlier. It is the highest 12-month growth since December 2016.

Index of manufacturing (IOM) grew by 0.4% in August 2017 compared with July 2017, the fastest 1-month growth since December 2016. Manufacturing also grew by 2.8% compared to twelve months earlier. It is the highest 12-month growth since November 2014.

Index of services (IOS) increased by 0.2% between July and August 2017 and also grew by 1.5% compared to August 2016. It is the 91st consecutive annual growth.

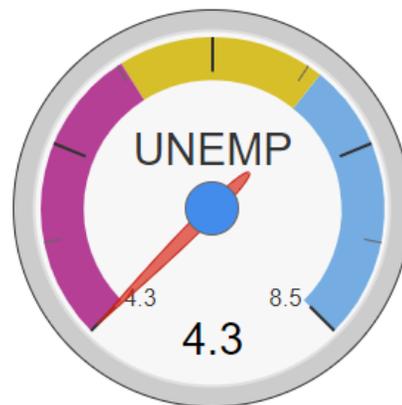

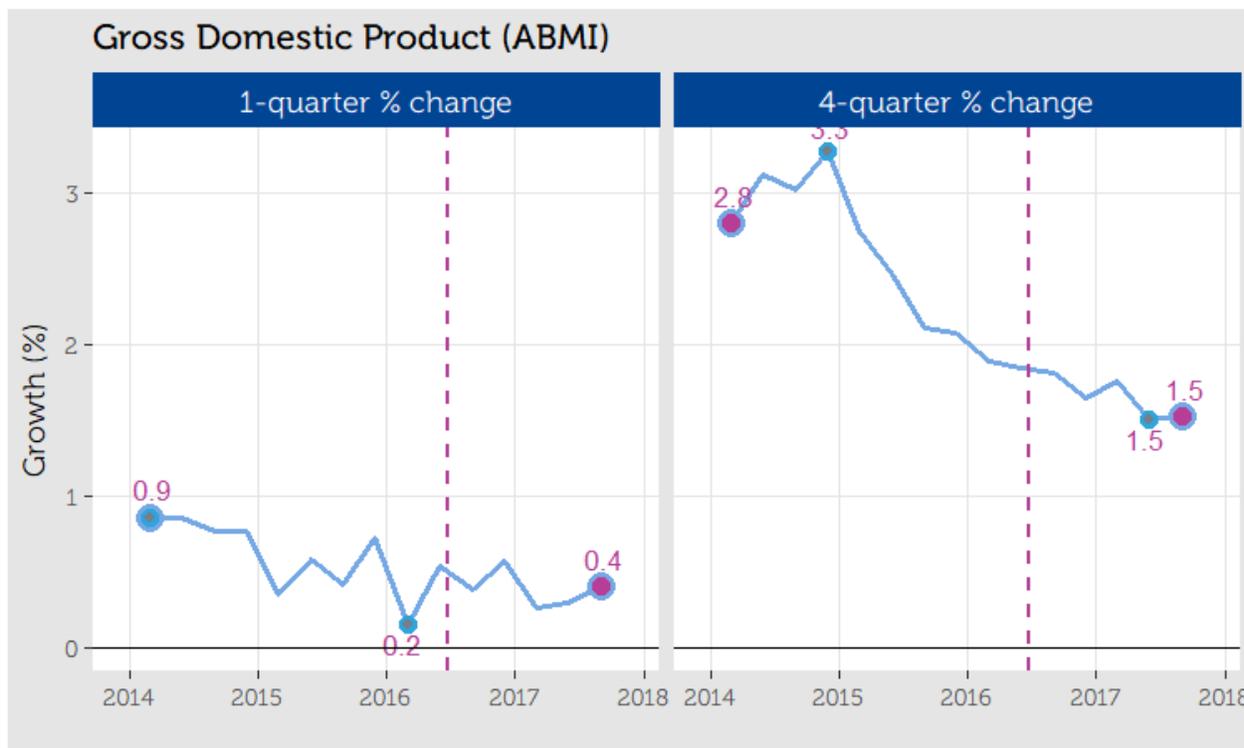

[Gauge Charts: 12-month % change since Jan 2000]

5 GDP & Unemployment

The first estimate of UK **gross domestic product** (GDP) growth, for 2017 Q3, was 0.4%. The Q3 GDP in value terms was equivalent to £488,862 million and a growth of 1.5% compared to 2016 Q3. Both service and production grew but construction contracted for a second quarter in a row.

The number of people in work increased by 94,000 in the three months to August 2017 to 32.10 million. **Unemployment** rate unchanged at 4.3%, the lowest since May 1975.

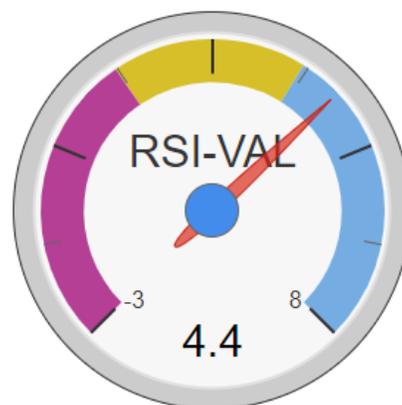

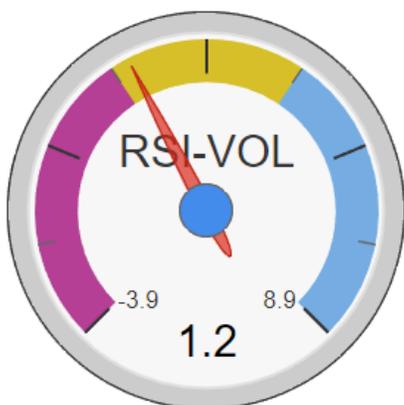

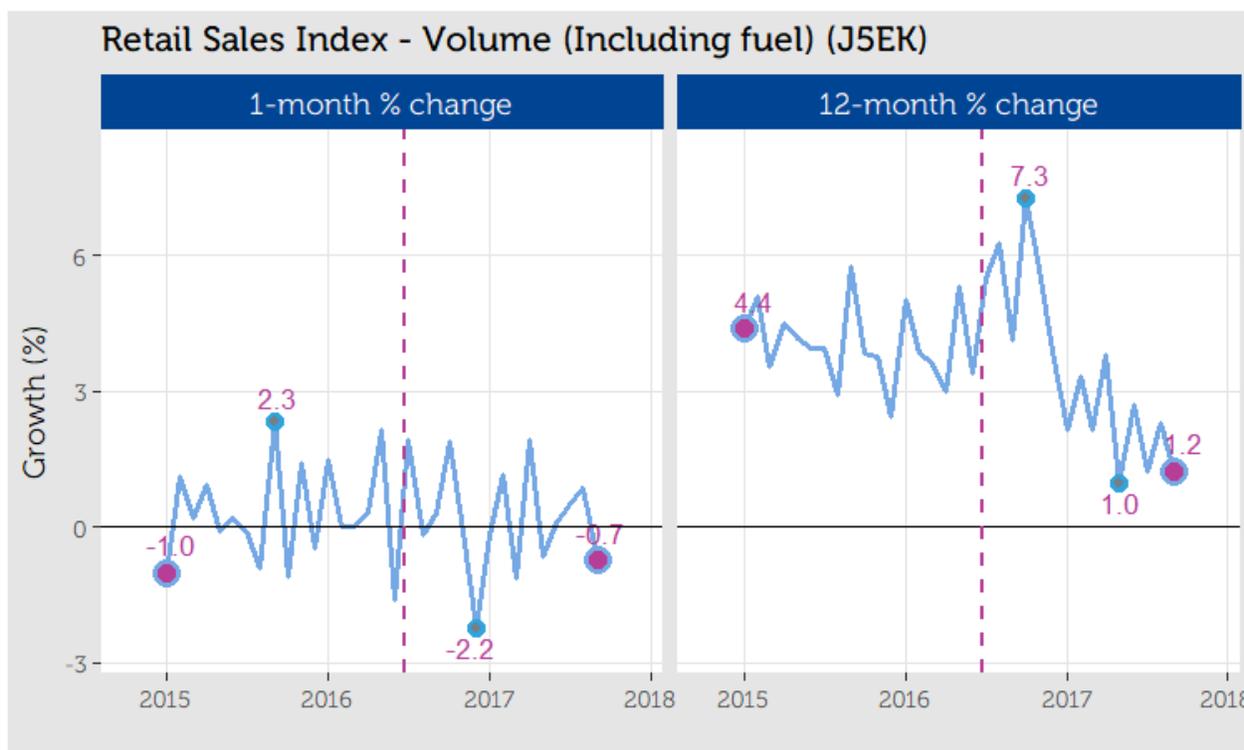

[Gauge Charts: GDP = 4-quarter % change since Jan 2000, UNEMP = Unemployment rate since 2000]

6 Retail Sales

The **volume of retail sales** (including fuel) fell by 0.7% between August and September 2017, but grew by 1.2% compared to twelve months earlier. The main drivers were non-food (household goods, clothing stores) and non-store retailing. It is the 54th successive year on year growth.

The **value of retail sales** (including fuel) fell by 0.6% between August and September 2017 but grew by 4.4% compare to 12 months earlier.

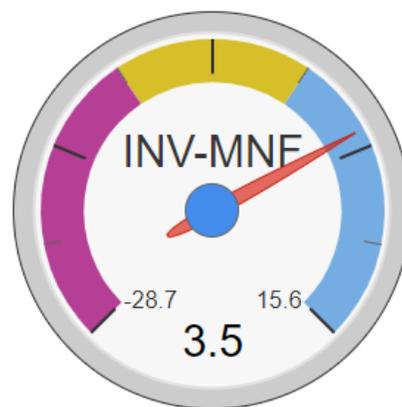

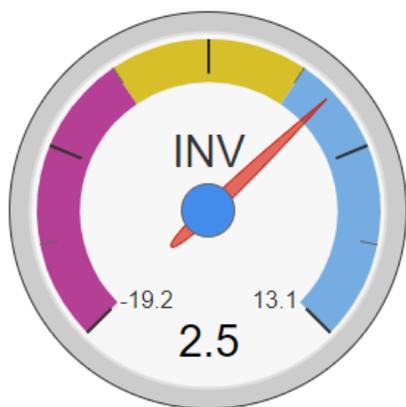

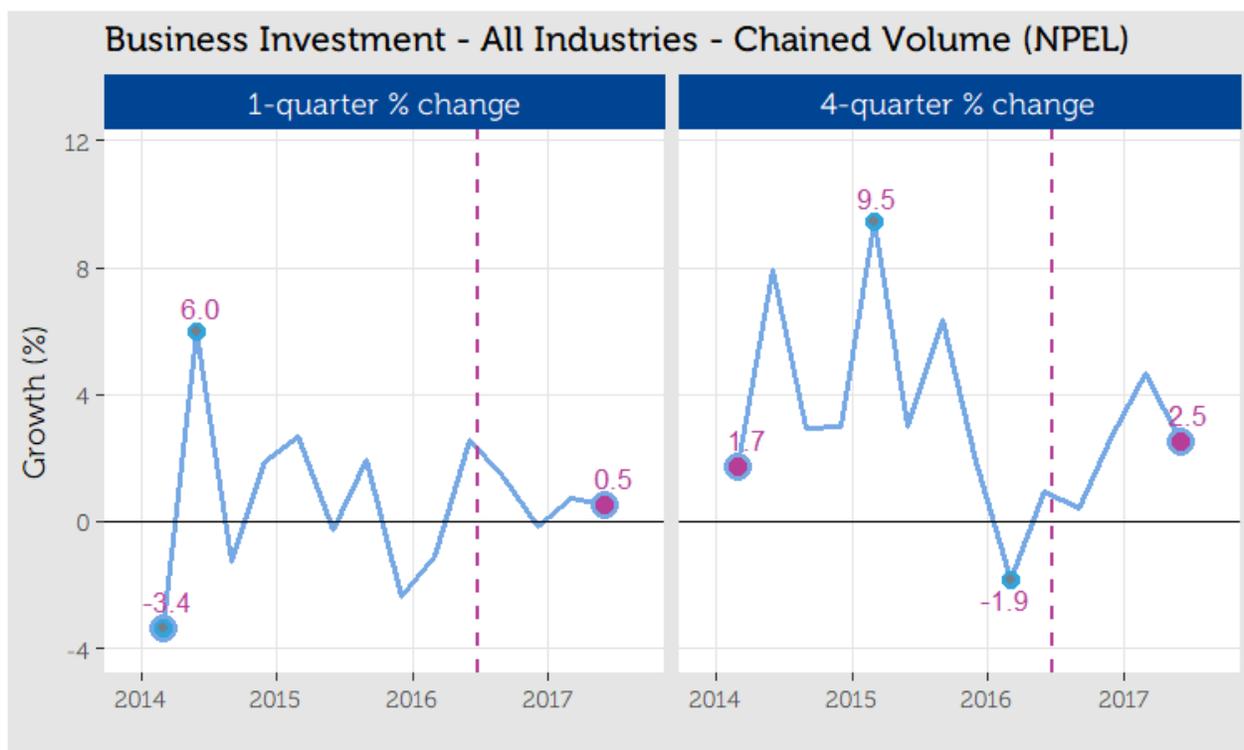

[Guage Charts: 12-month % change since Jan 2000]

7 Business Investment

Business investment for all industries (INV), in volume terms, grew by 0.5% in 2017 Q2, revised up from 0.0% in the preliminary estimate. Compare to a year earlier, business investment also grew by 2.5%.

Investment in **manufacturing industries** (INV-MNF), in volume terms, decreased by 1.8% in 2017 Q2 and also fell by 12.1% compared to 2016 Q2. It is the highest 1-year (or 4-quarter) fall since 2009 Q4 and the 8th successive year on year decline.

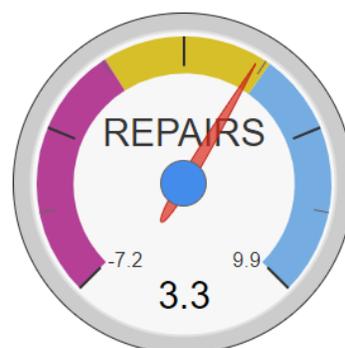

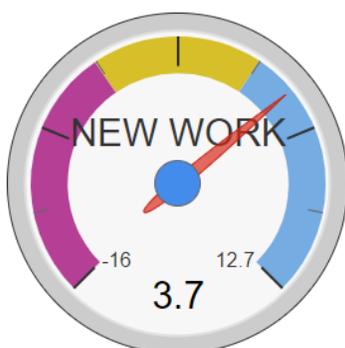

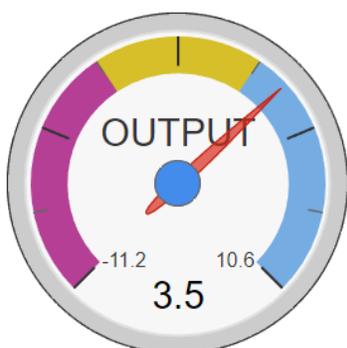

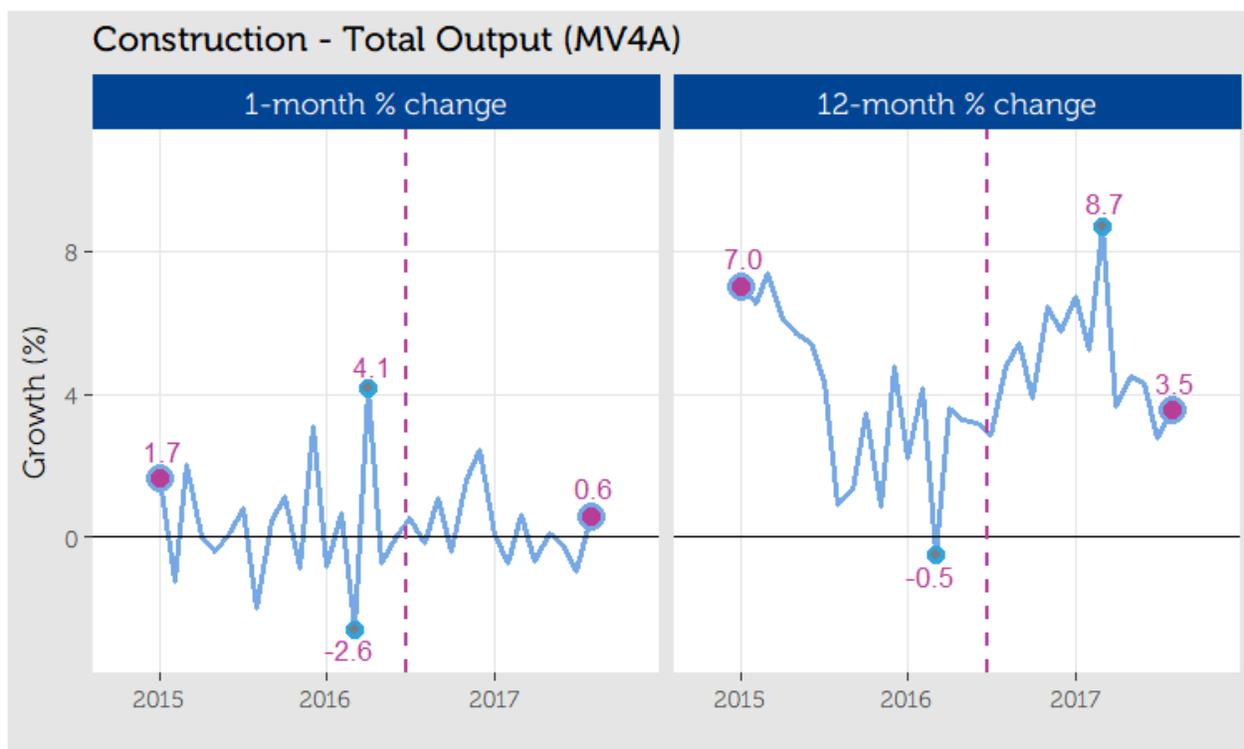

[Gauge Charts: 4-quarter % change since 2007]

8 Construction

Total **construction output**, at constant prices, grew by 0.6% in August 2017 to £12.8 billion, compared to July 2017. Compared to twelve months earlier, output in August 2017 also grew by 3.5%.

New construction work, rose by 1.7% to £8.3 billion in the month of August 2017 but **construction repairs** fell by 1.3% to £4.5 billion in the same period. Compared to twelve months earlier, new construction work in August 2017 rose by 3.7% and repairs also rose by 3.3%.

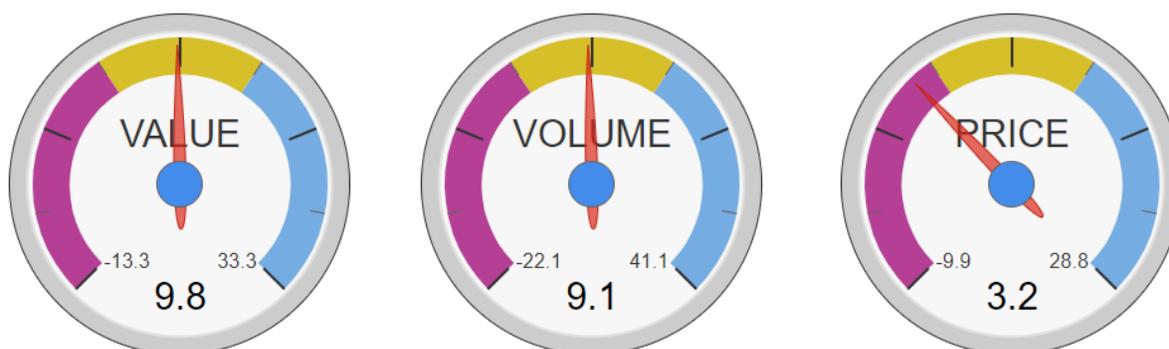

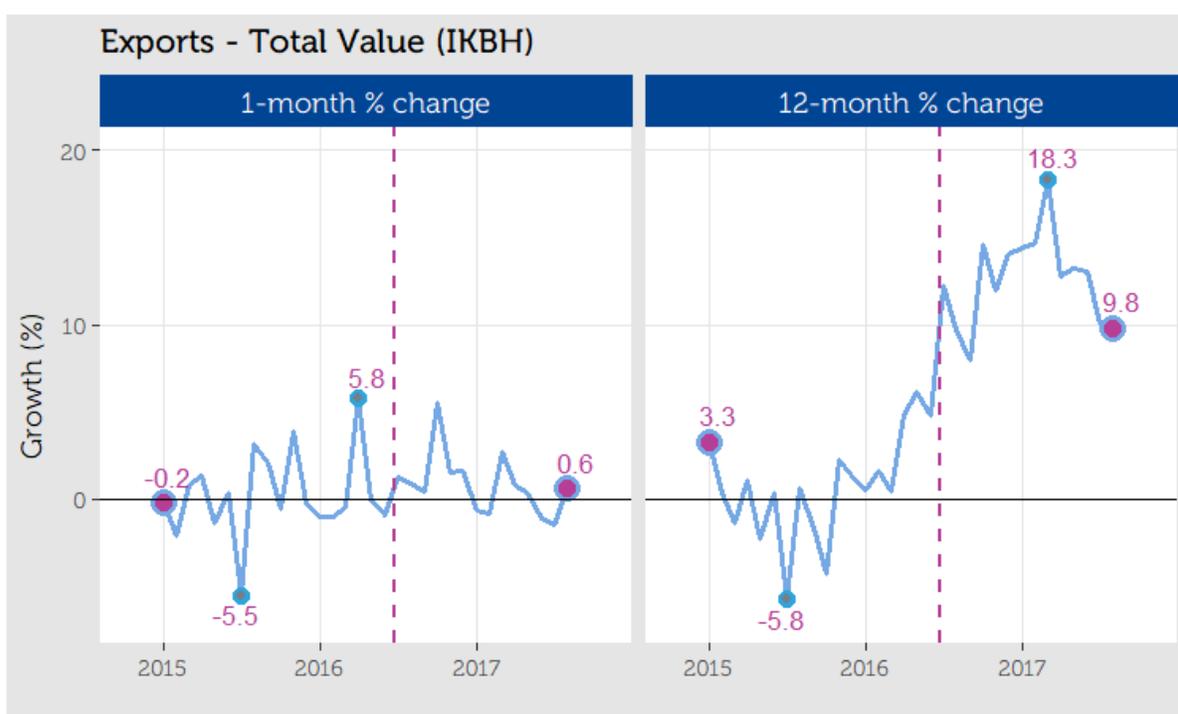

[Gauge Charts: 12-month % change since Jan 2010, OUTPUT = Total Construction Output, NEW WORK = Total Construction New Work, REPAIRS = Total Repairs, Maintenance and Infrastructure]

9 UK Trade

9.1 Exports

The **value** of UK **exports** grew by 0.6% between July and August 2017 and also grew by 9.8% compared to August 2016. Exports of **goods** increased by 12.1% to £ 28.2 billion and exports of **services** increased by 7.0% to £ 22.0 billion in August 2017 compared to twelve months earlier.

Volume of UK **exports** increased by 0.7% in August 2017 compared a month earlier and also increased by 9.1% compared to twelve months earlier.

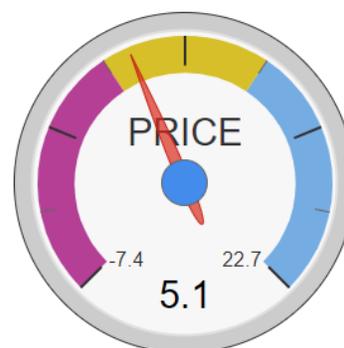

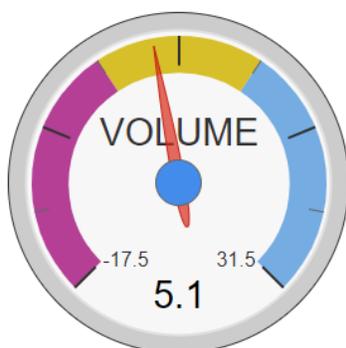

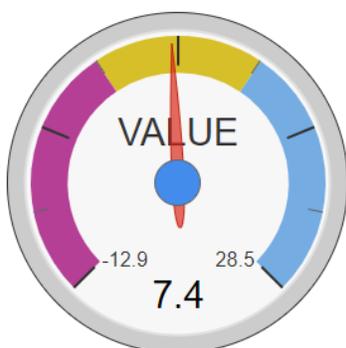

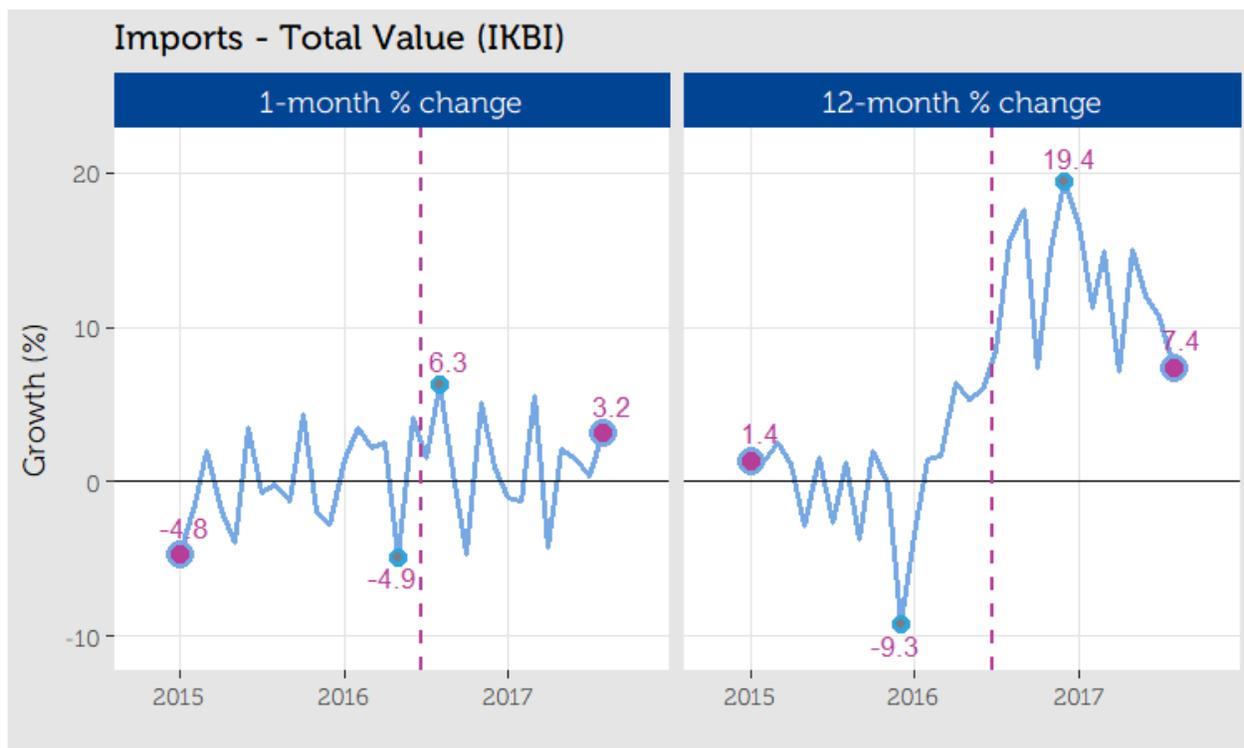

[Gauge Charts: 12-month % change since Jan 2000, VALUE = Total Export Value, VOLUME = Export Volume Index, PRICE = Export Price Index]

9.2 Imports

The **value** of UK **imports** grew by 3.2% between July and August 2017. The value of imports in August 2017 was equivalent to £55.8 billion and a growth of by 7.4% compared twelve months earlier. It is the 19th successive annual growth.

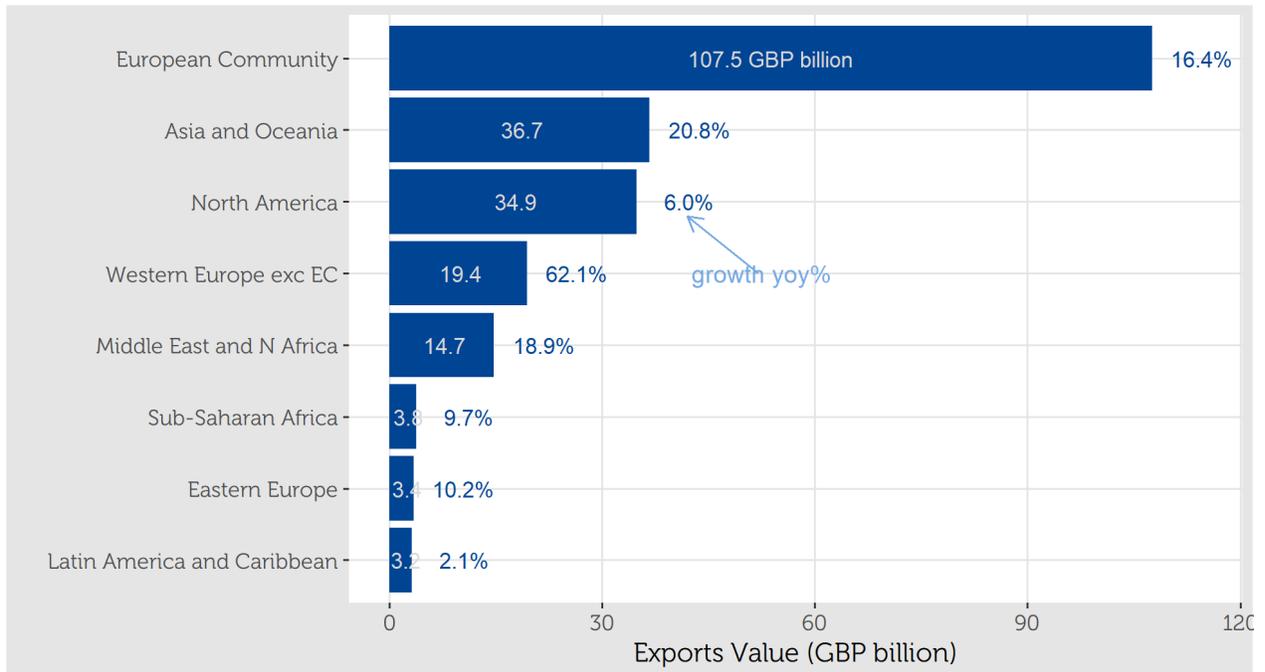

UK **imports** on **volume** basis rose by 4.2% in August compared with July 2017 and also grew by 5.1% compared to twelve months earlier. It is the 4th successive year on year growth.

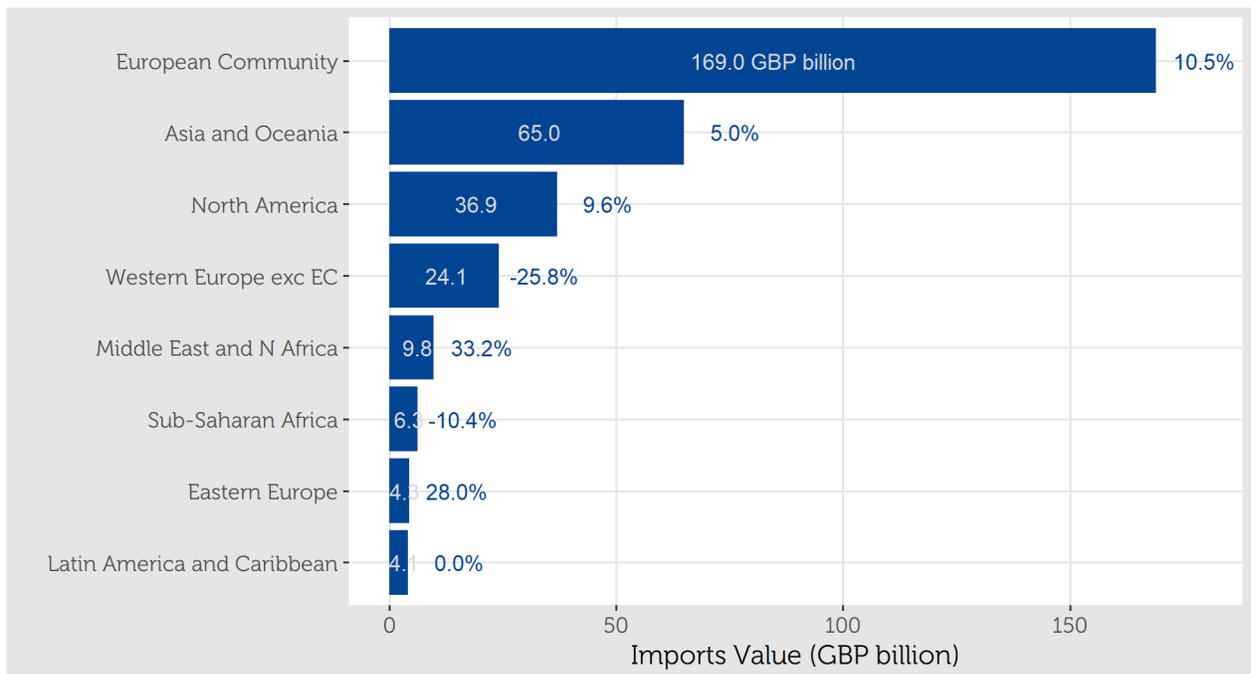

[Gauge Charts: 12-month % change since Jan 2000, VALUE = Total Import Value, VOLUME = Import Volume Index, PRICE = Import Price Index]

9.3 Goods Trade: Ranking by Region

9.3.1 Exports - 2017 (Jan - Aug)

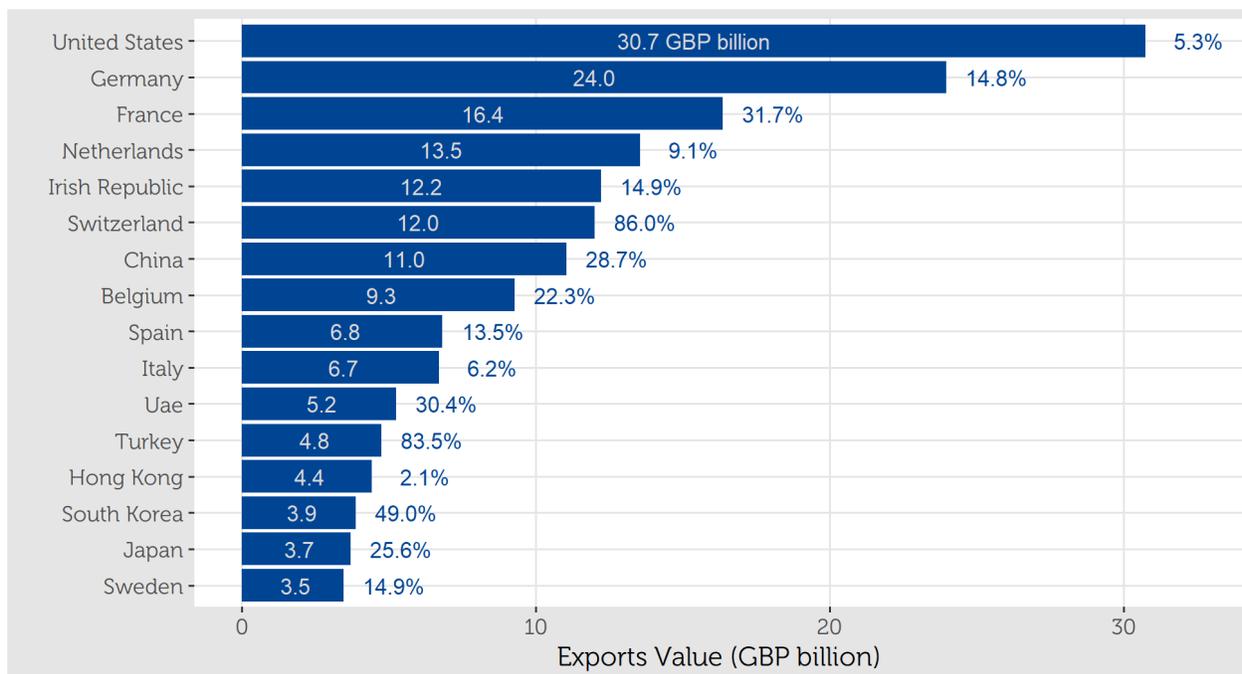

9.3.2 Imports - 2017 (Jan - Aug)

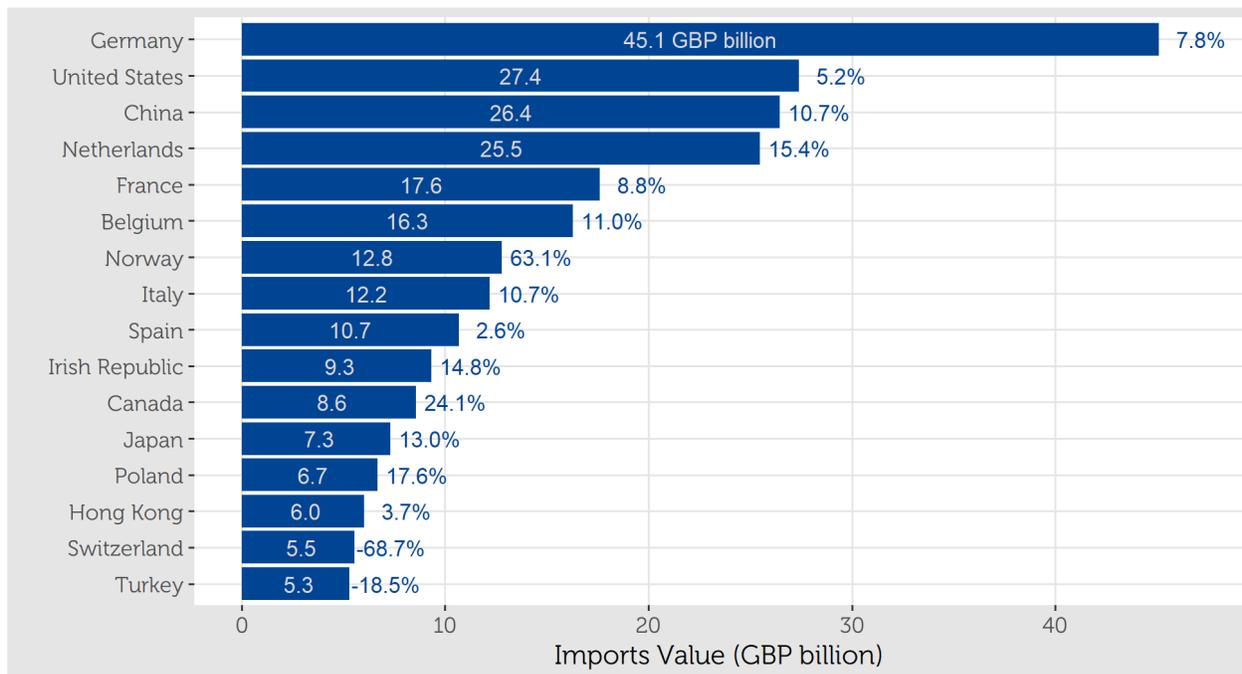

9.4 Goods Trade: Ranking by Country - Top 16

9.4.1 Exports - 2017 (Jan - Aug)

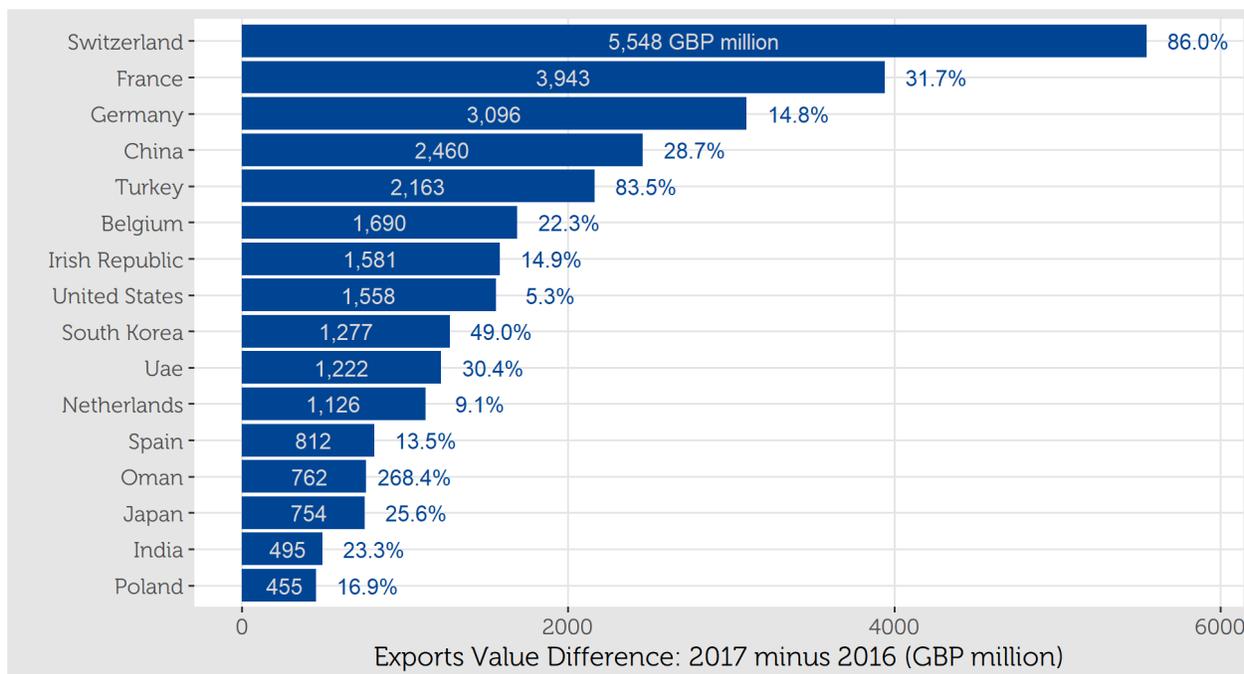

9.4.2 Imports - 2017 (Jan - Aug)

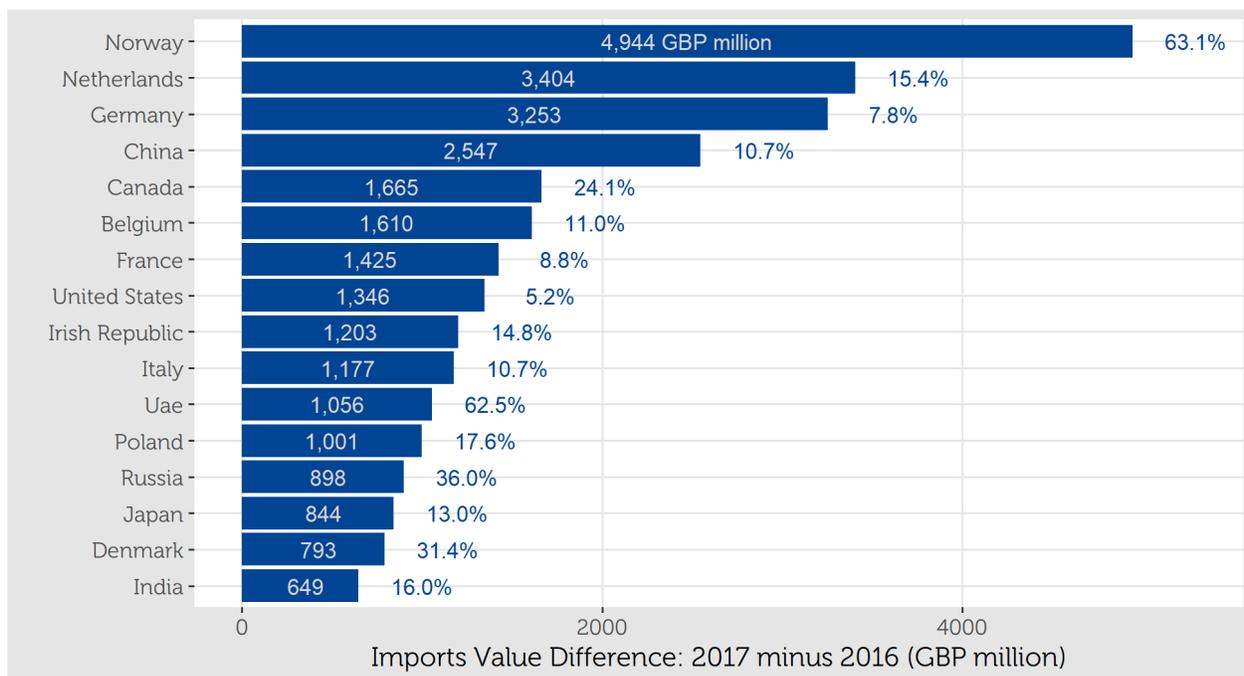

9.5 Goods Trade: Growth Ranking by Country - Top 16

9.5.1 Exports Value Growth - 2017 (Jan - Aug)

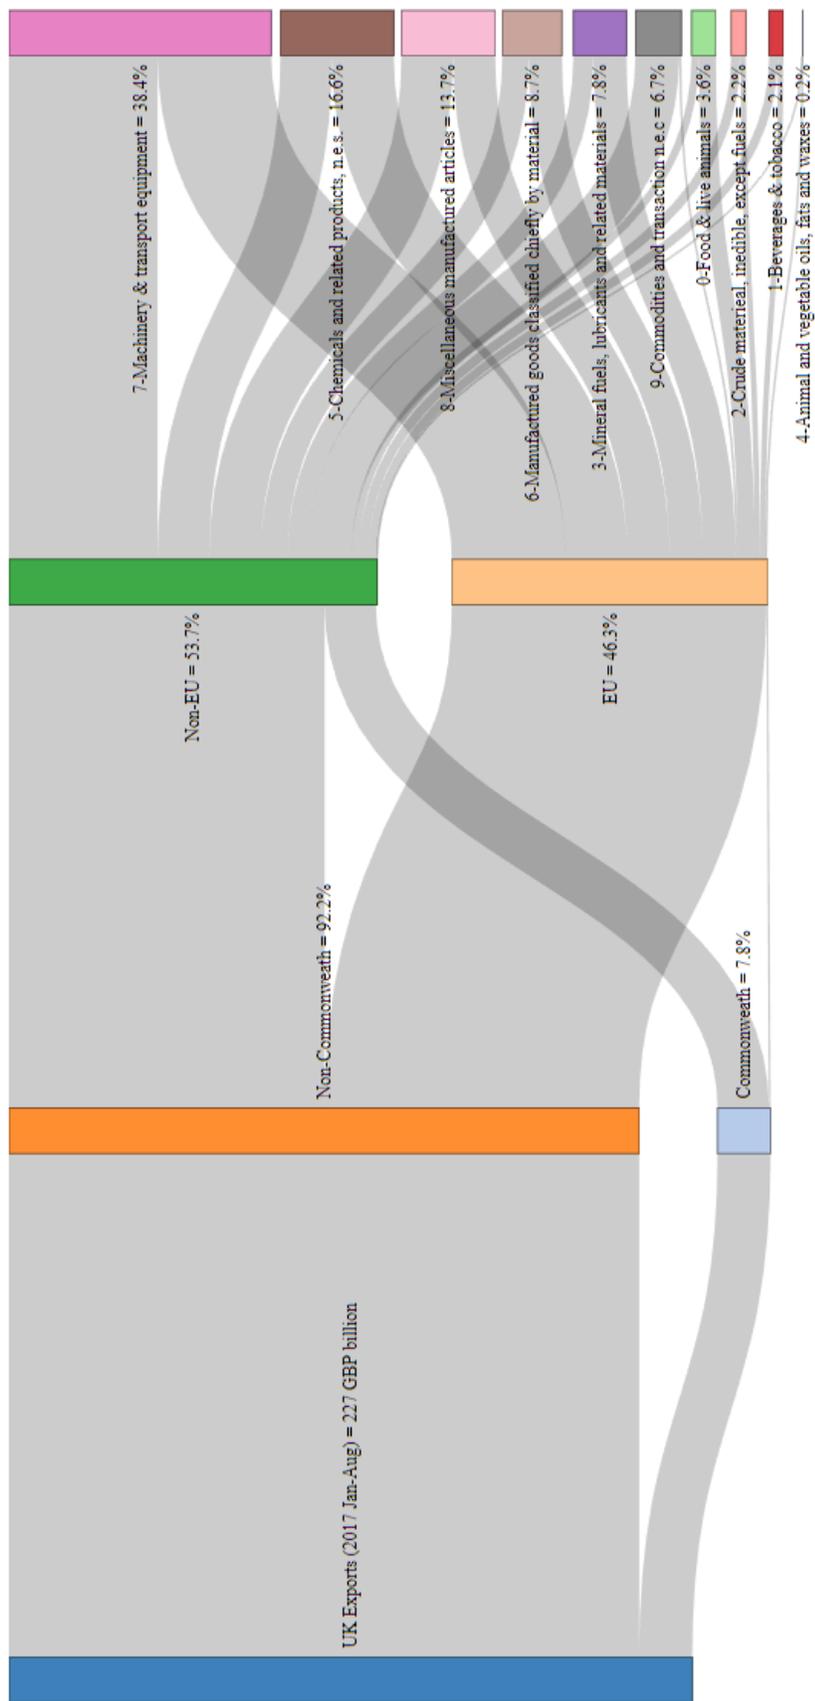

9.5.2 Imports Value Growth - 2017 (Jan - Aug)

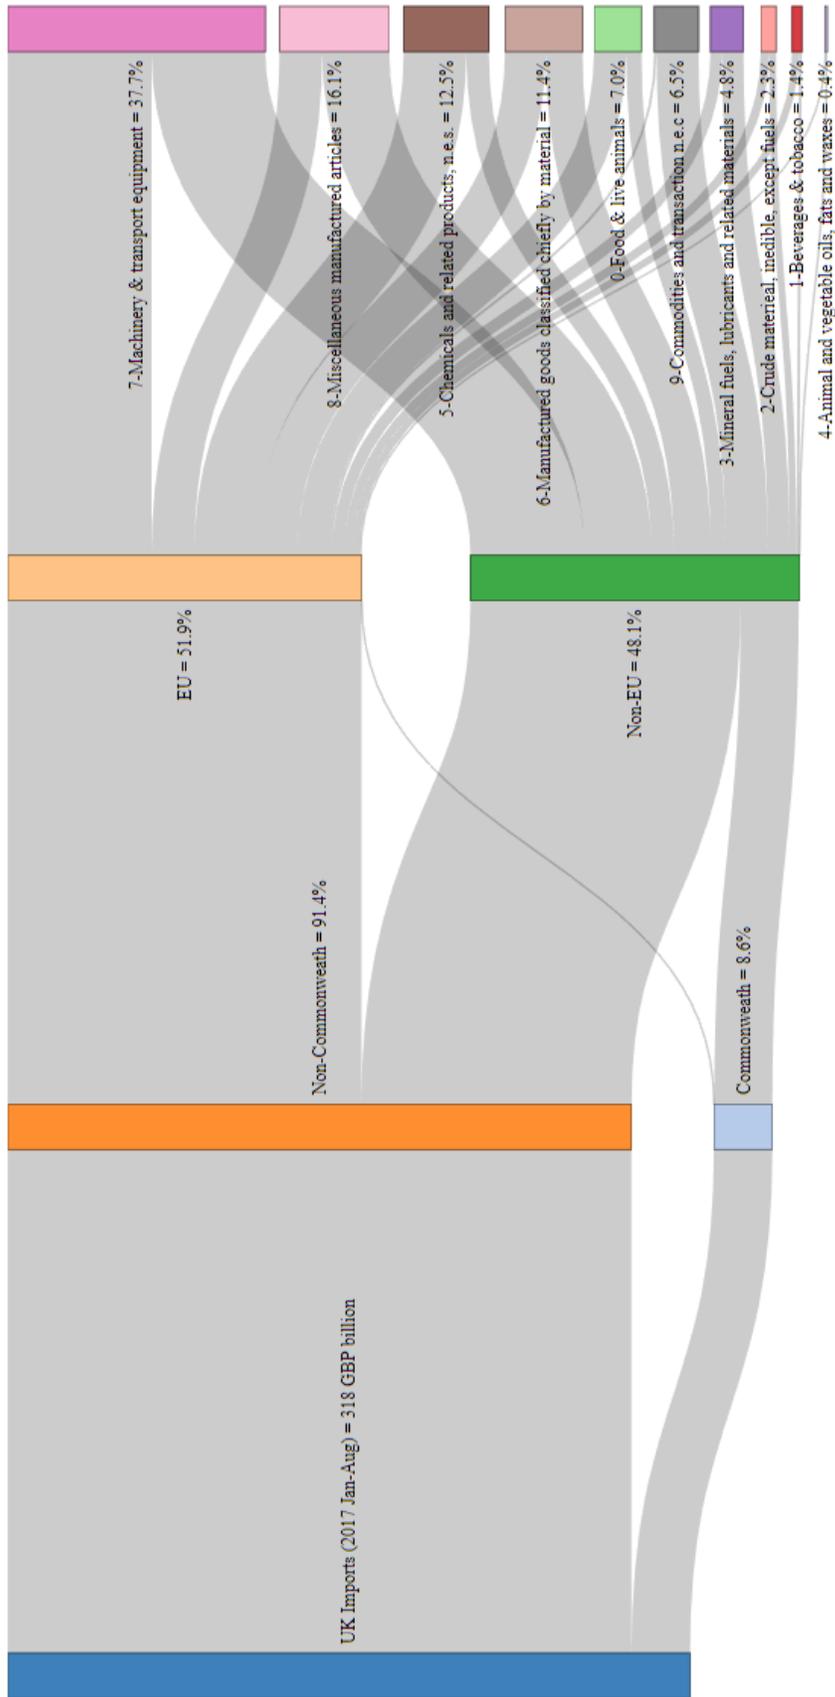

9.6 Goods Trade: EU & Commonwealth by SITC

9.6.1 Exports - 2017 (Jan - Aug)

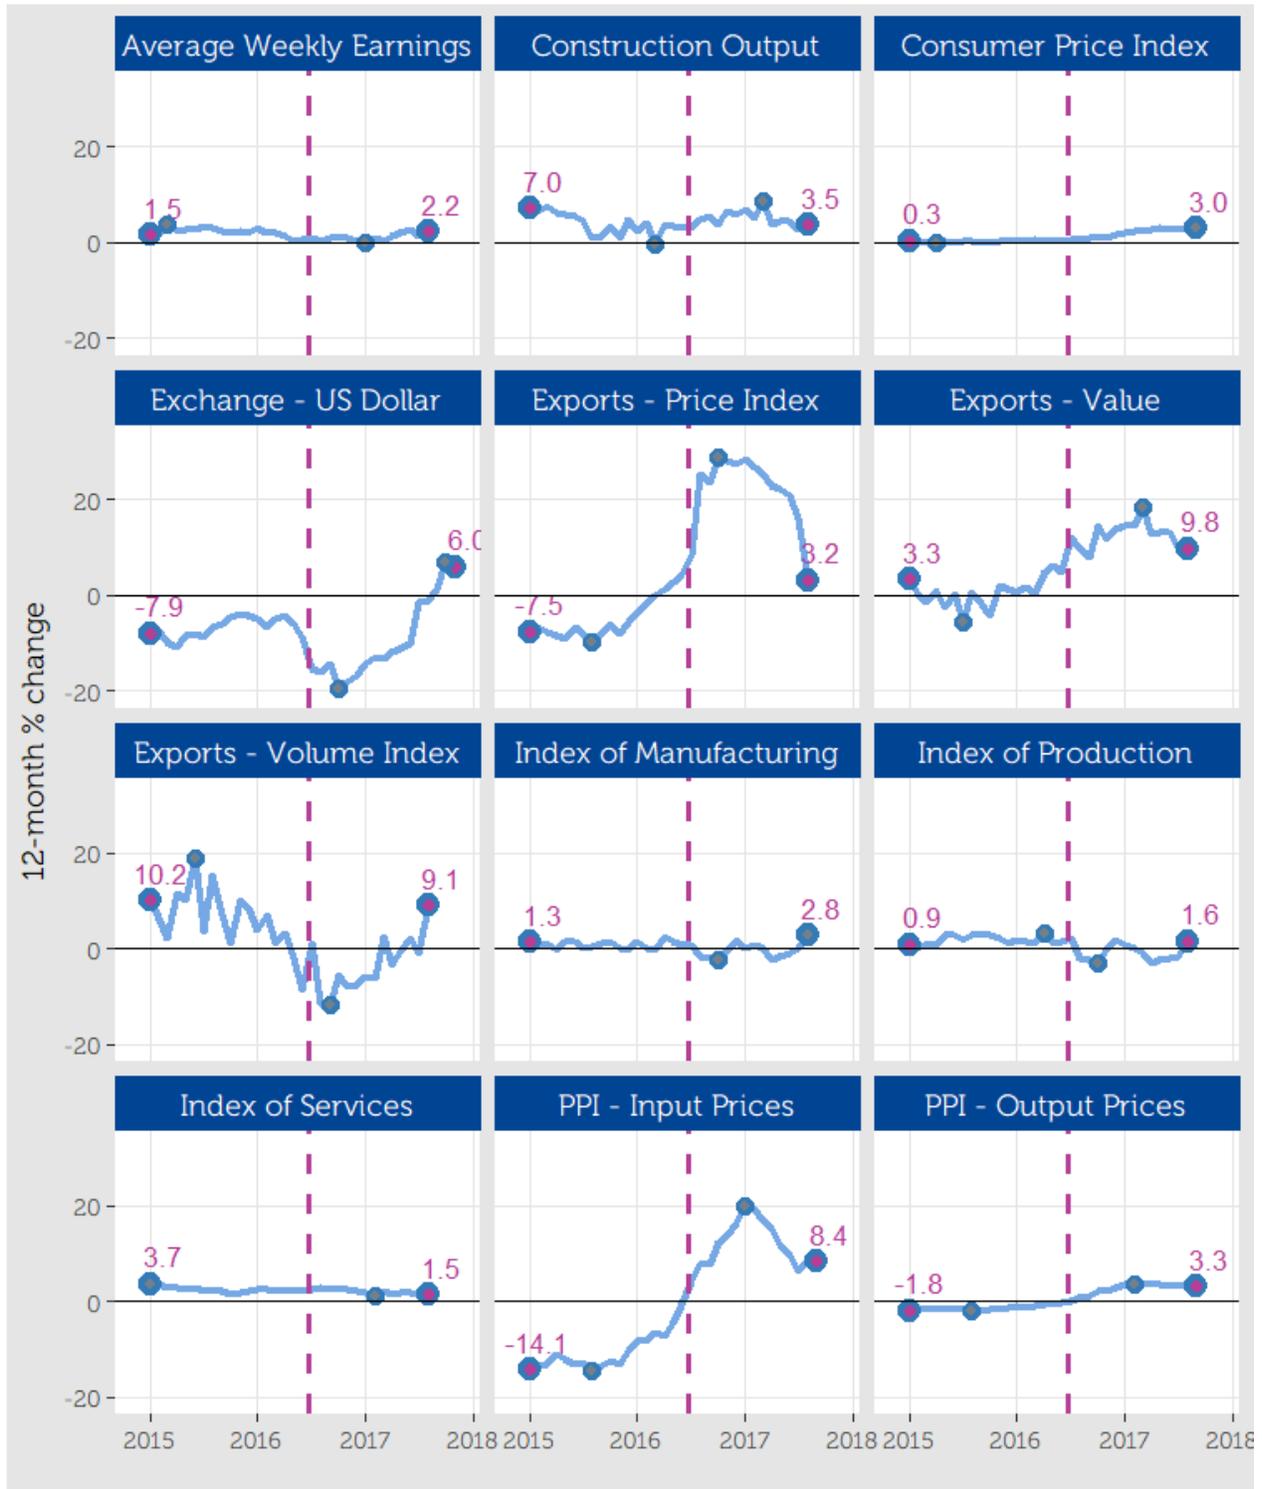

9.6.2 Imports - 2017 (Jan - Aug)

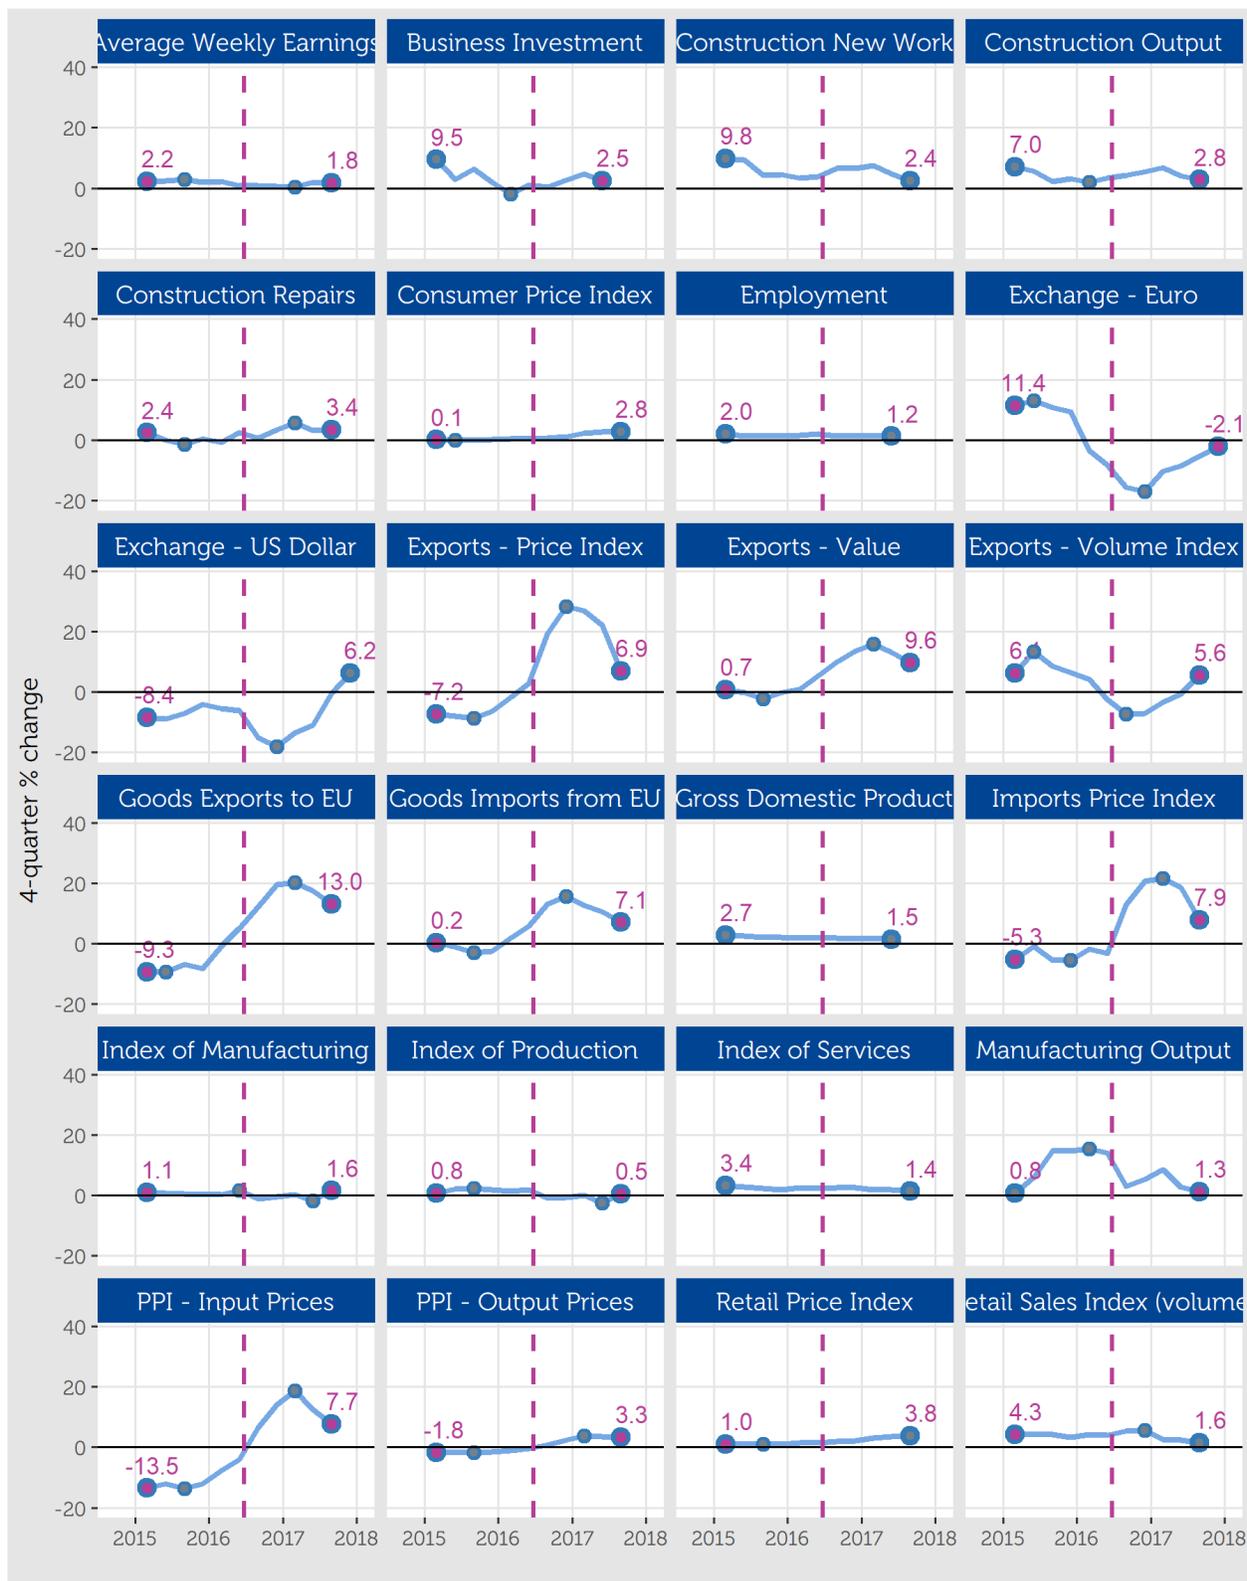

10 Economy At a Glance

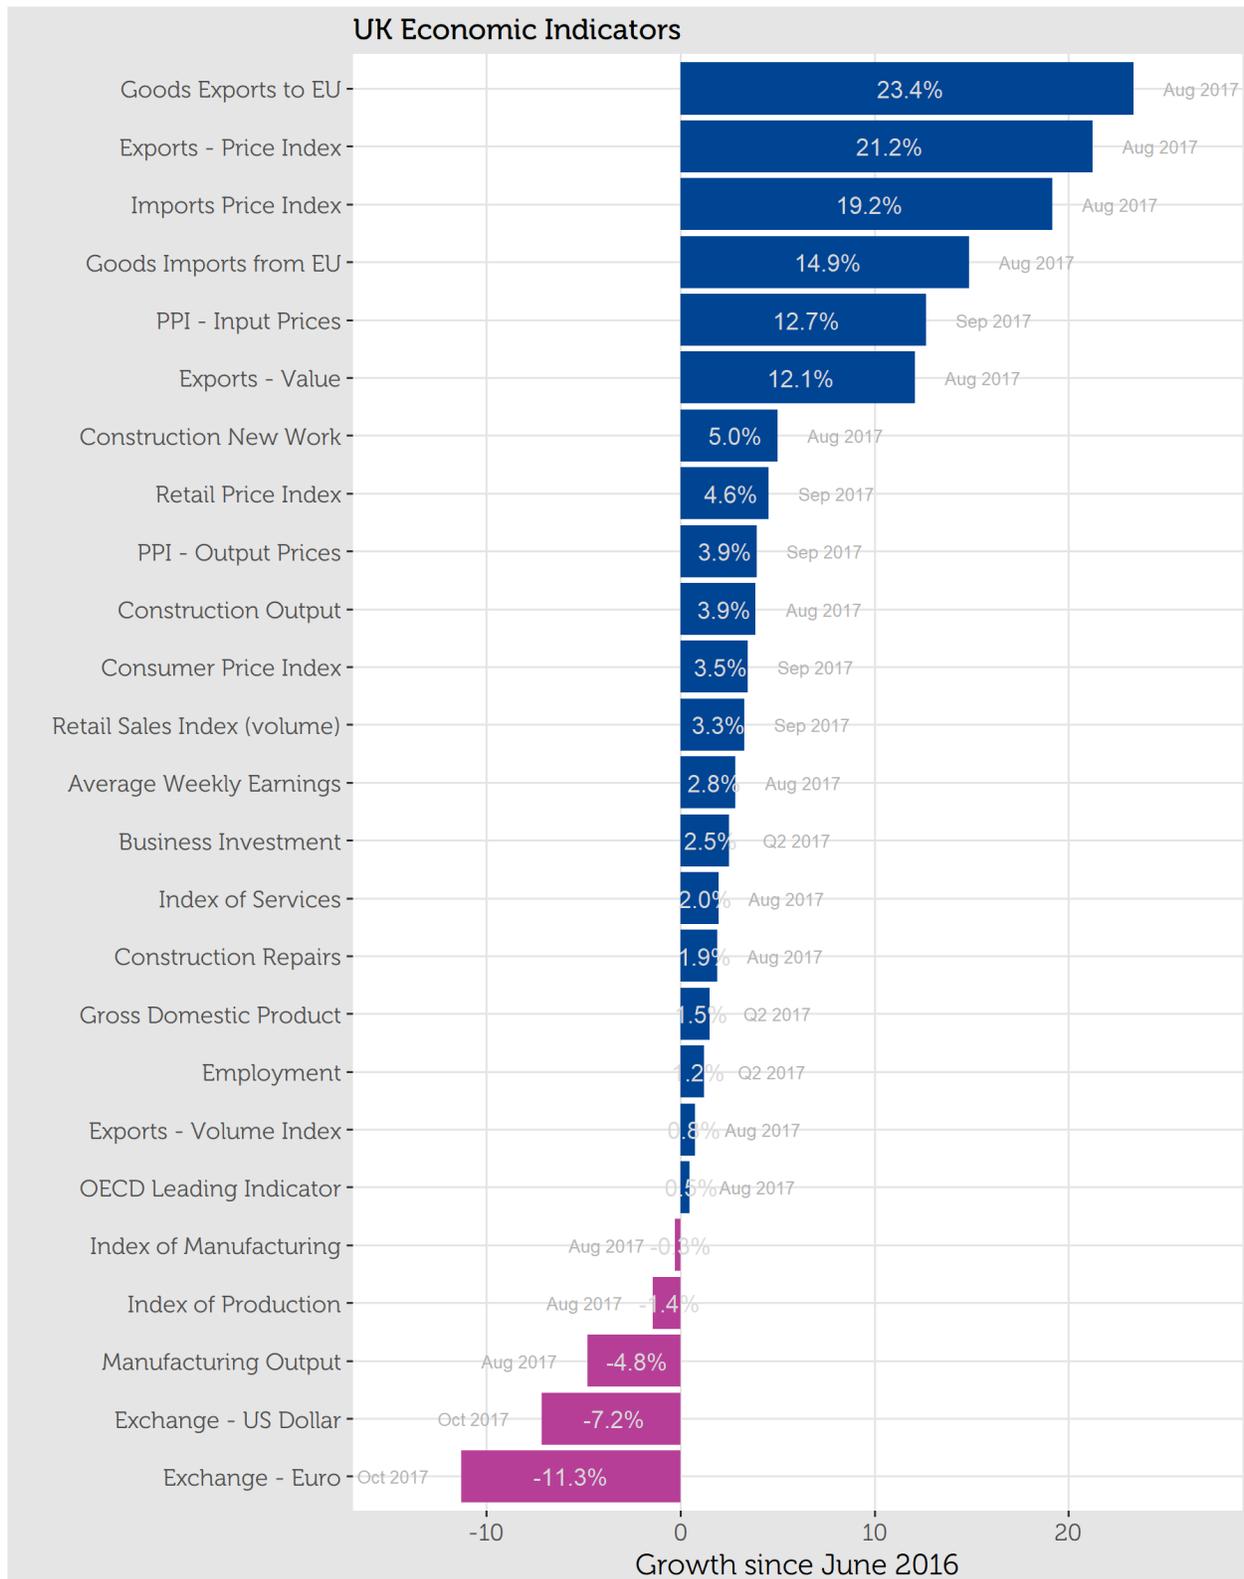

10.1 Growth: 12-month % growth

10.2 Growth: 4-quarter % growth

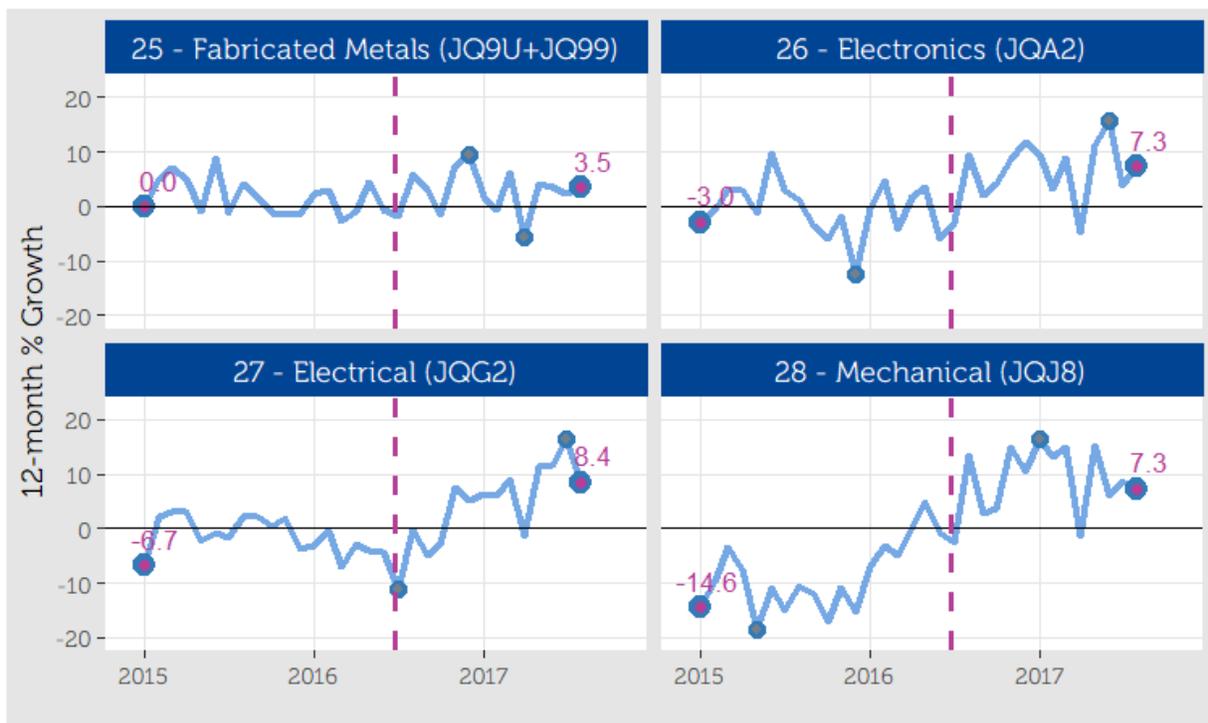

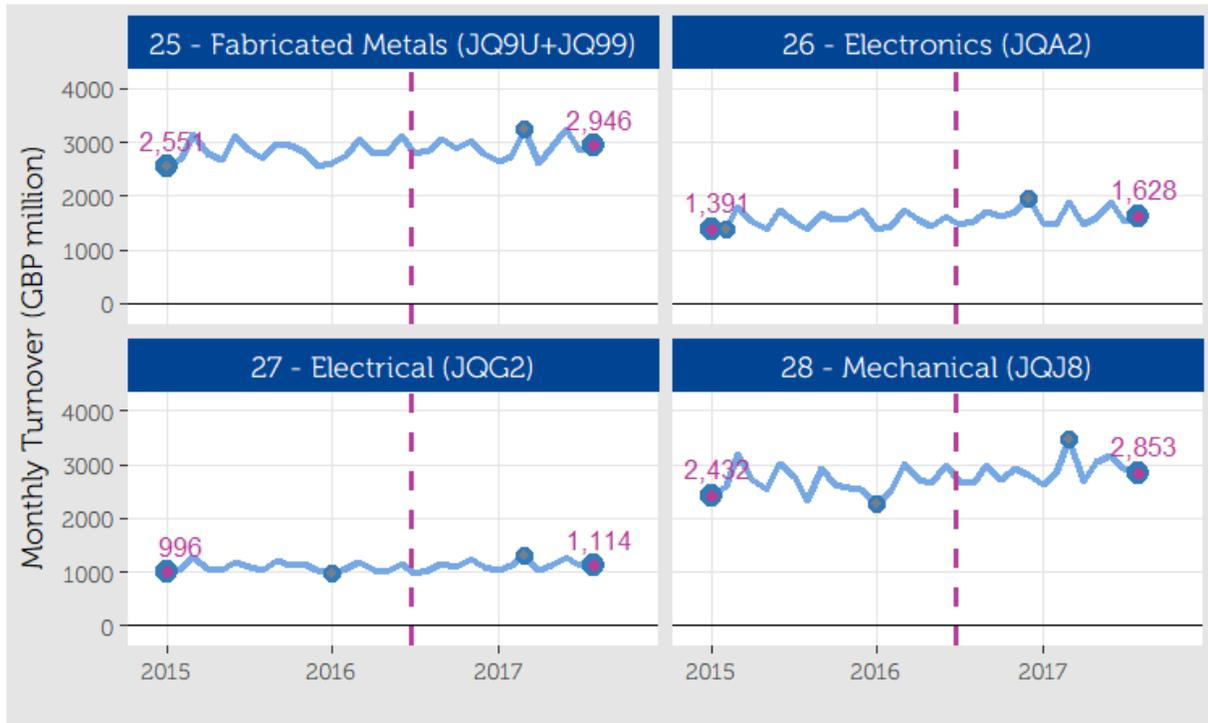

10.3 Growth: Since Referendum Vote

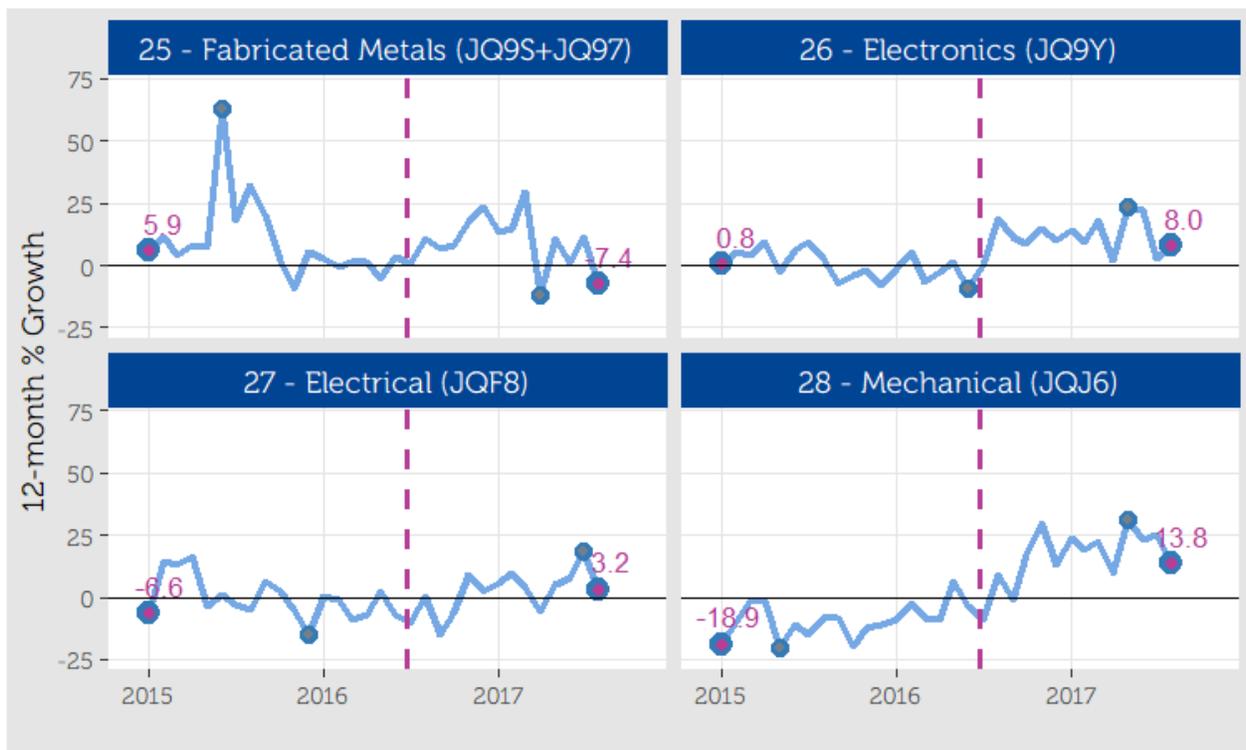

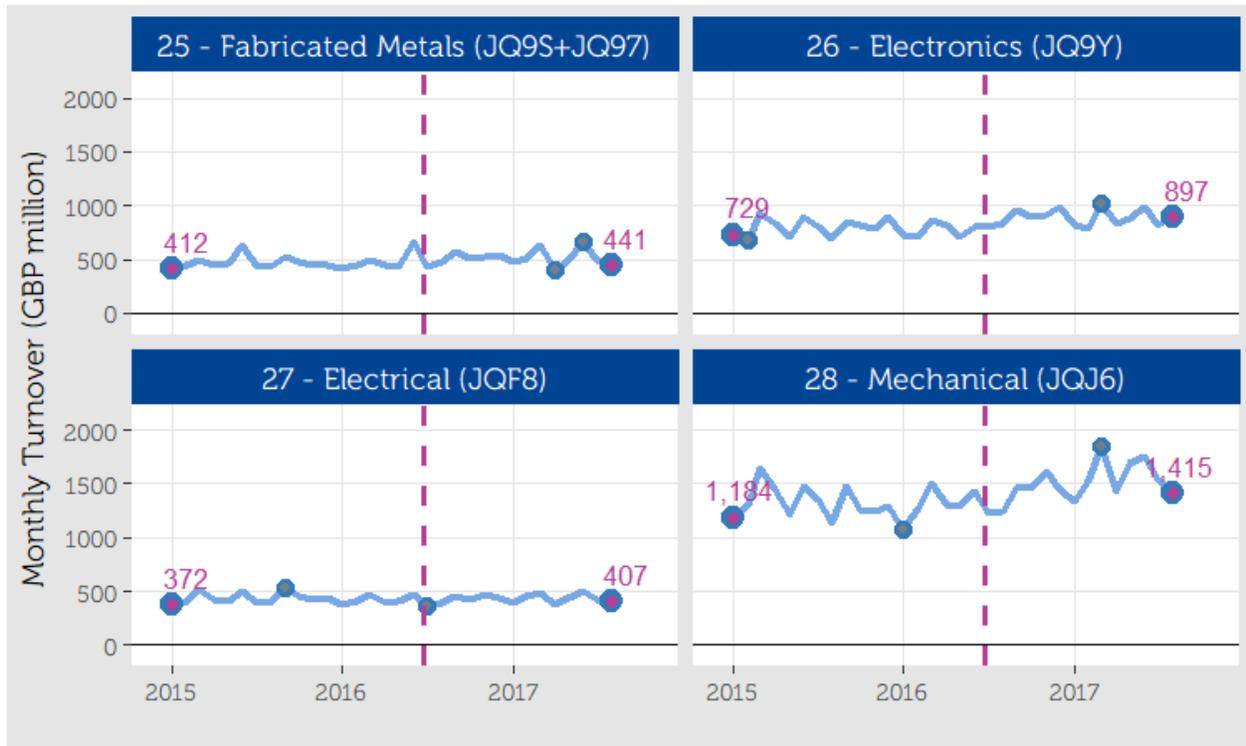

11 Industry Level Indicators

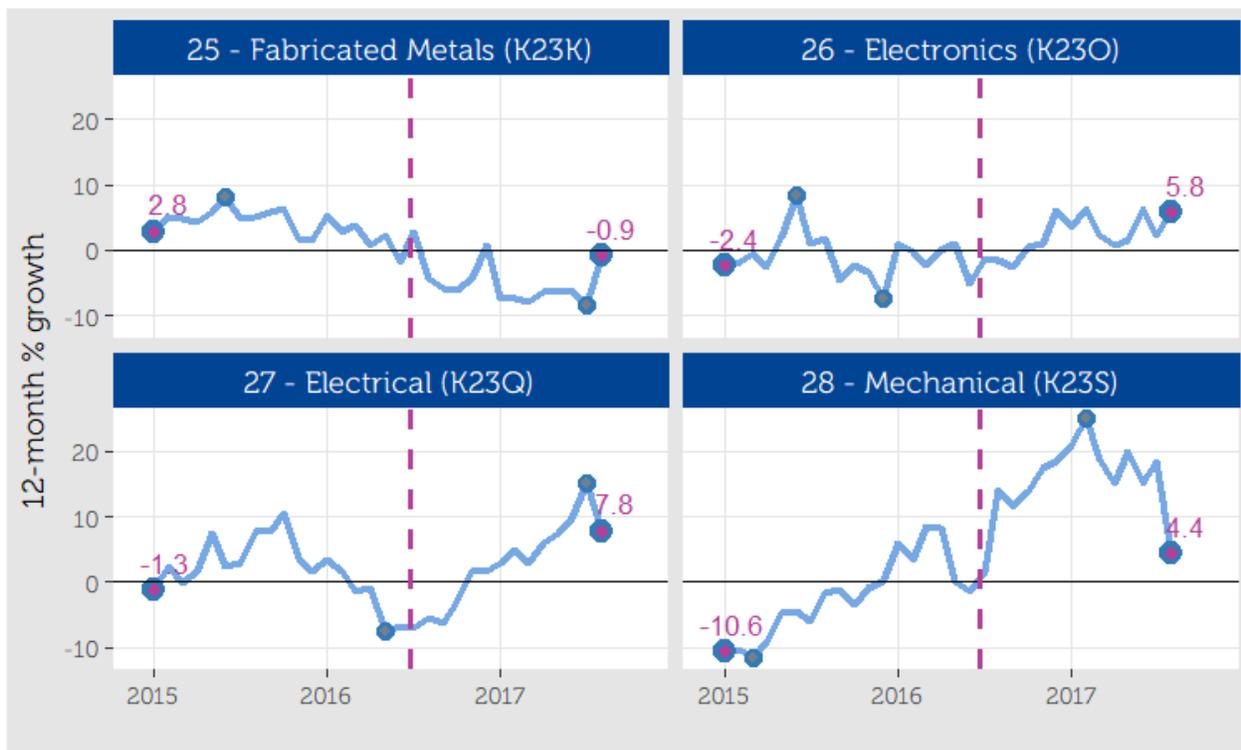

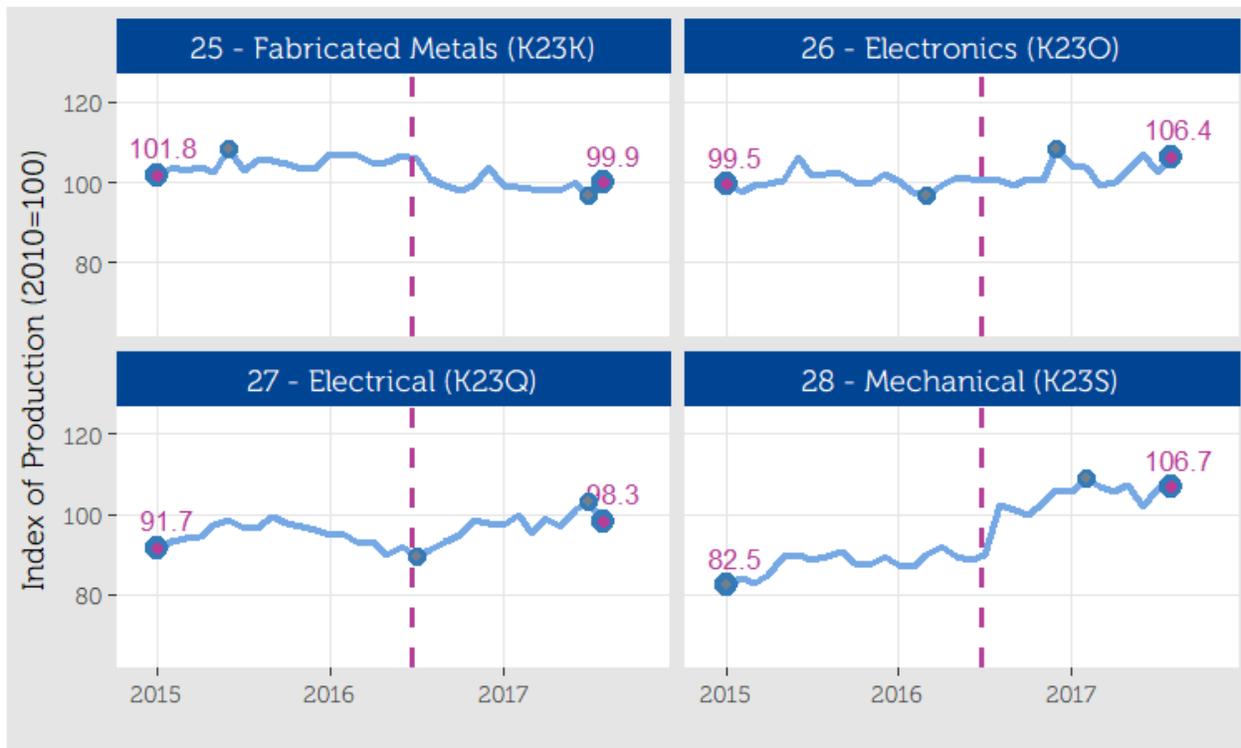

11.1 Turnover

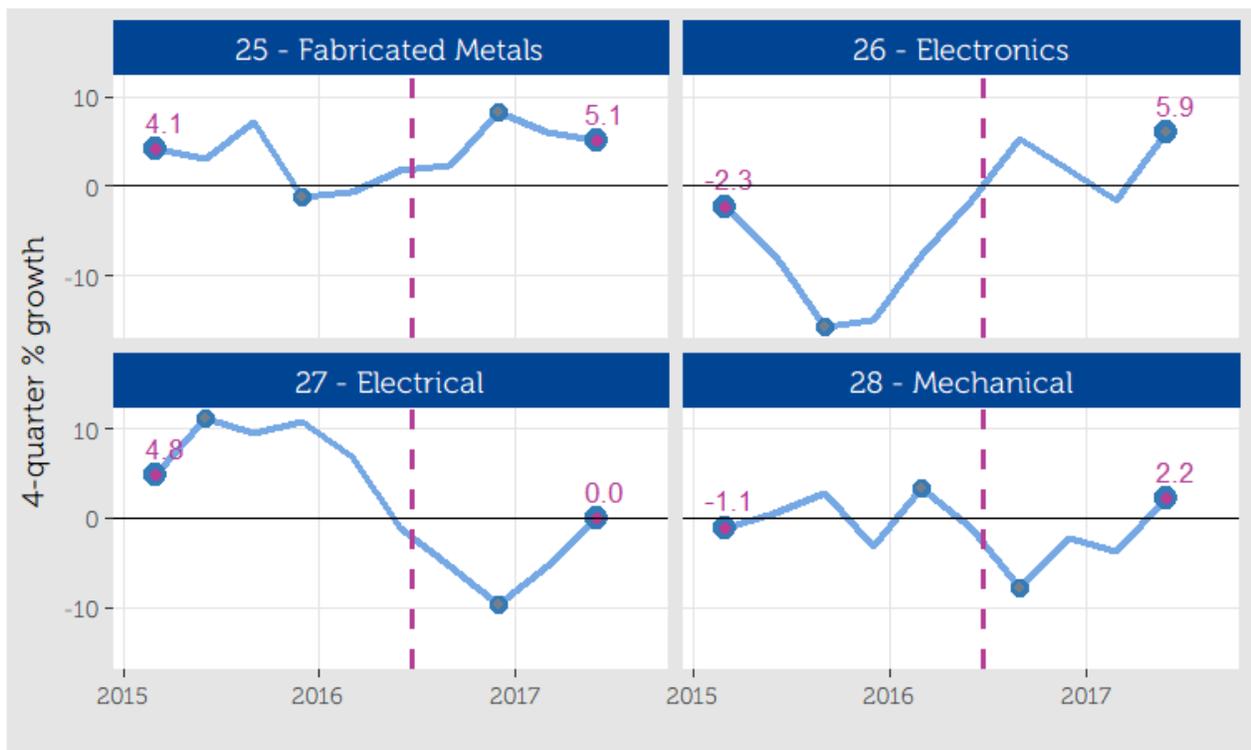

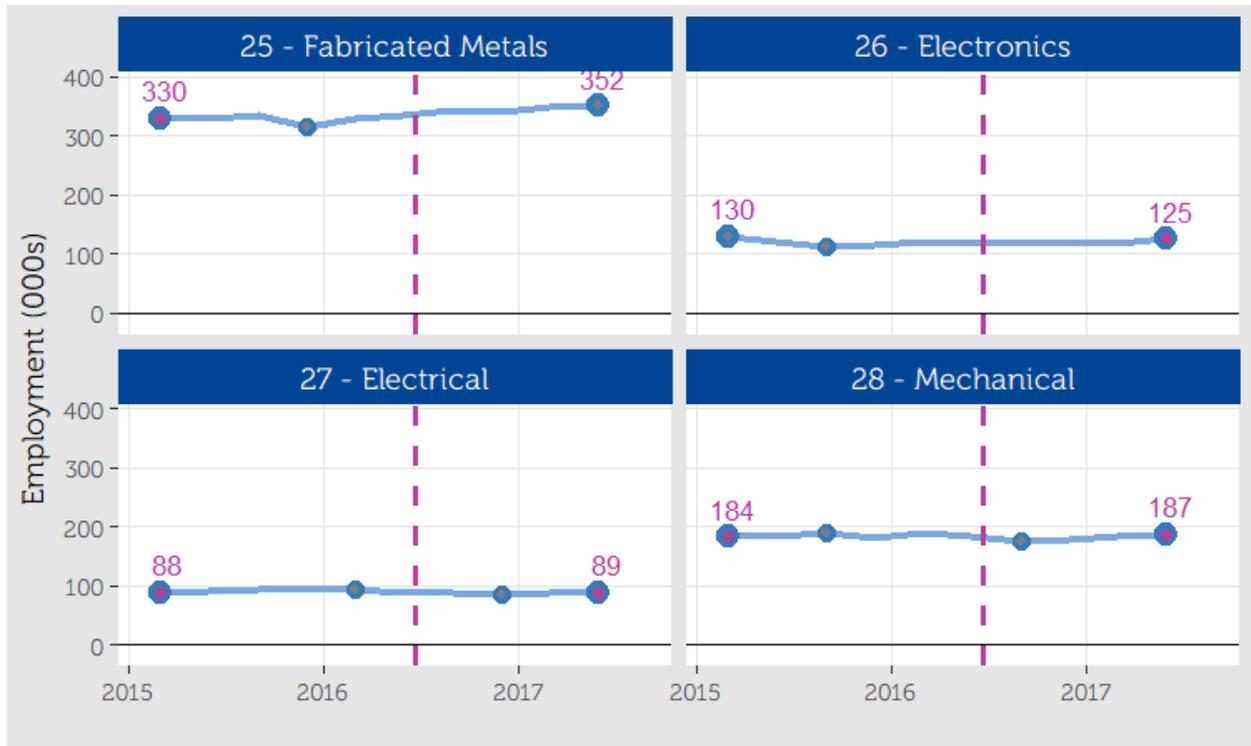

11.2 Exports

11.3 Index of Production

11.4 Employment (including Self-Employment)

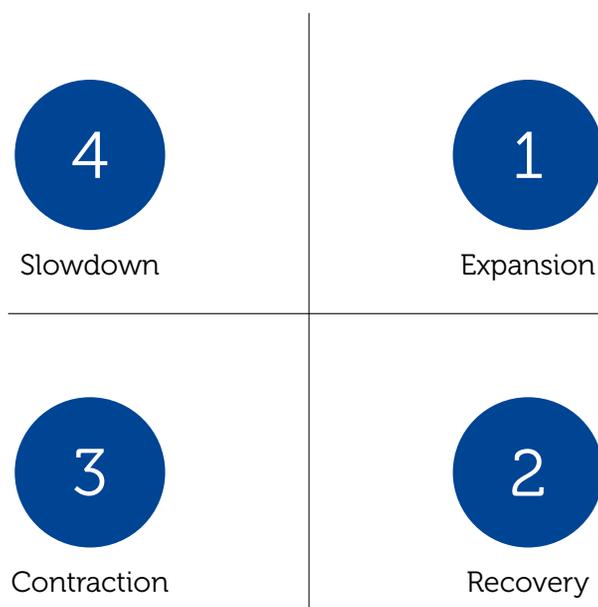

12 Growth Cycles

12.1 About Growth Cycles

Growth cycle, plots the annual growth of an indicator against the 1-month (or 1-quarter) growth. This put the indicator in one of 4 main quadrants:

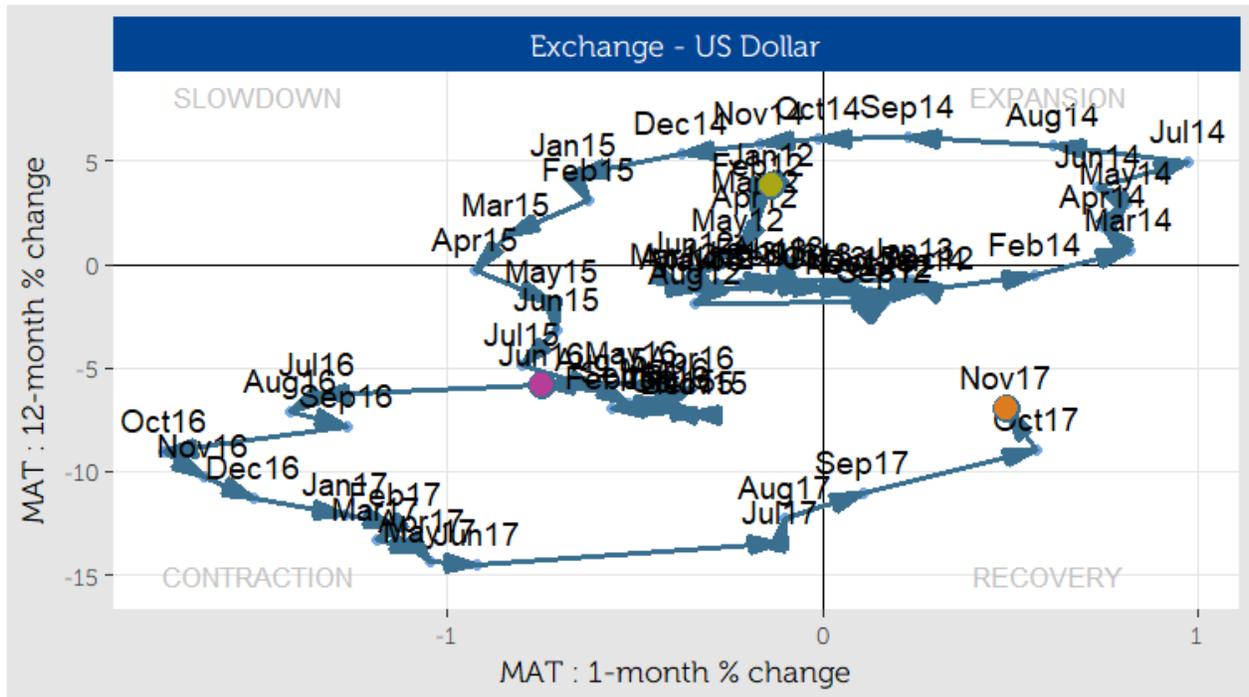

- Quadrant 1: increased compared to previous month (or quarter) and also increased compared previous year - **expansion**
- Quadrant 2: increased compared to previous month (or quarter) but decreased compared to previous year - **recovery**
- Quadrant 3: decreased compared to previous month (or quarter) and also decreased compared to previous year - **contraction**
- Quadrant 4: decreased compared to previous month (or quarter) but increased compared previous year - **slowdown**

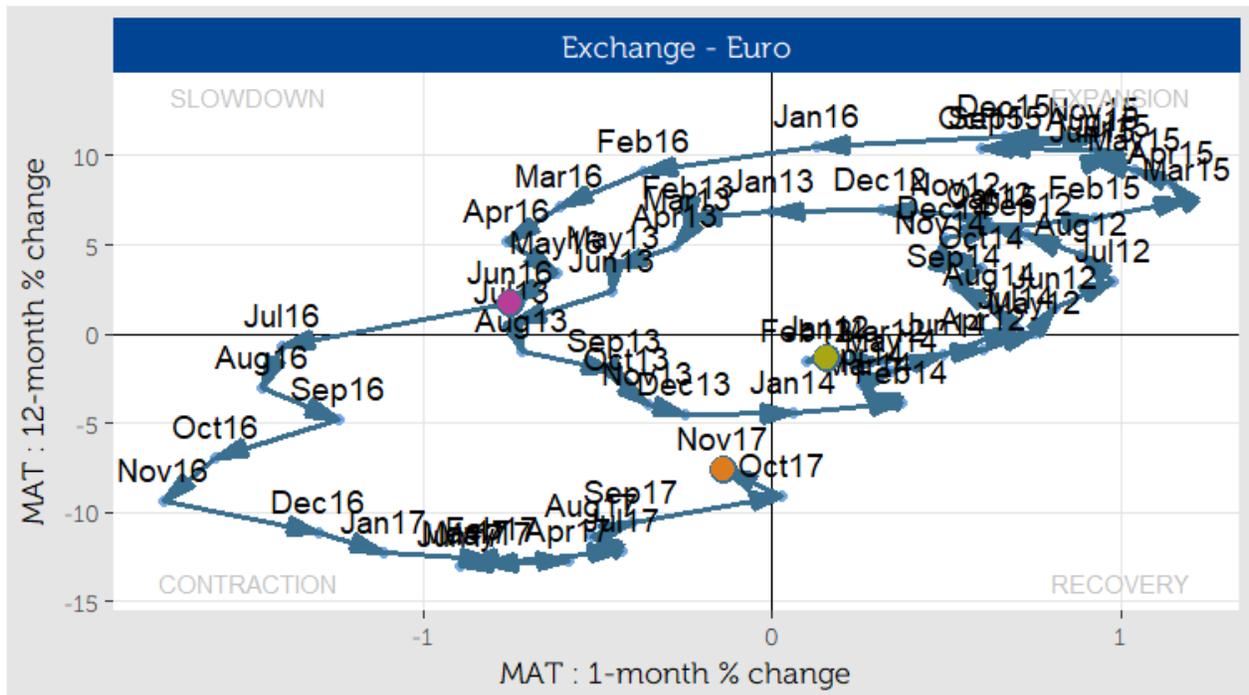

The direction or where an indicator is heading to is found by connecting indicator's position over a period of time. Majority of indicators have seasonal components which can sometimes obscure the underlying trends. Using Moving Annual Total (MAT) helps to remove this seasonality. Where MAT has been used instead of the actual indicator, the axis label is preceded by the 'MAT'.

This section shows growth cycle plots of 8 selected indicators. The starting points are marked with green circle (●); purple circle (●) for referendum date and orange circle (●) for the current state.

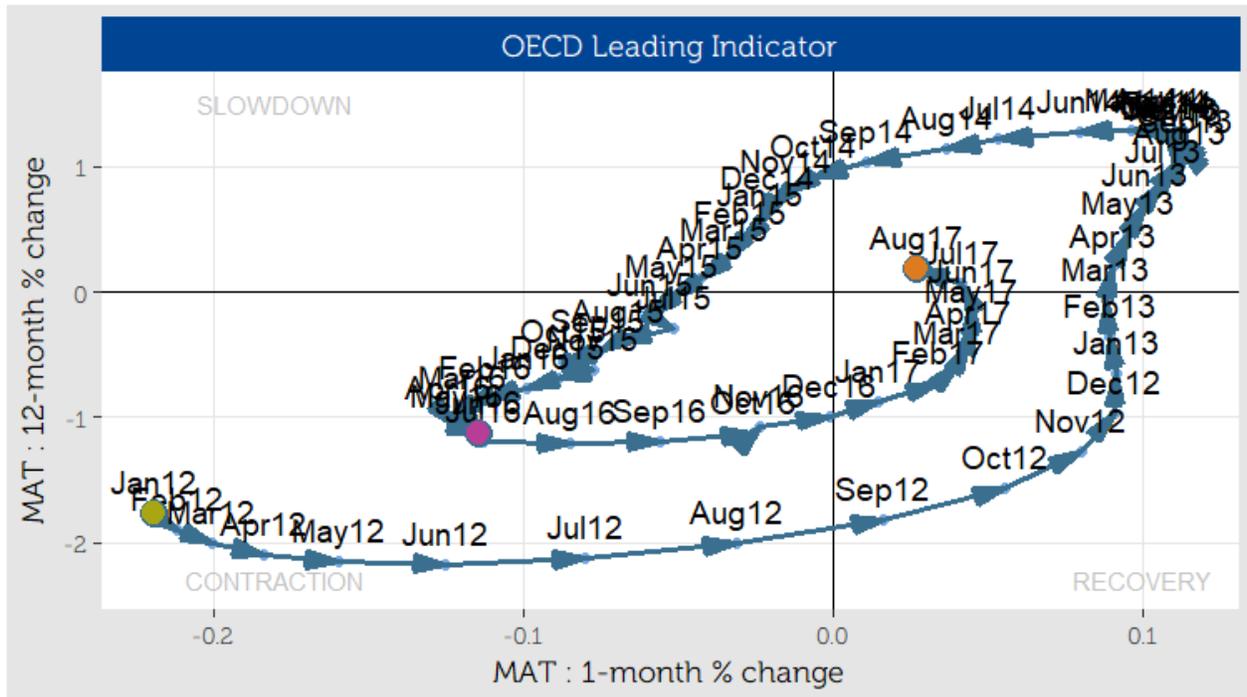

12.2 Exchange Rate (USD)

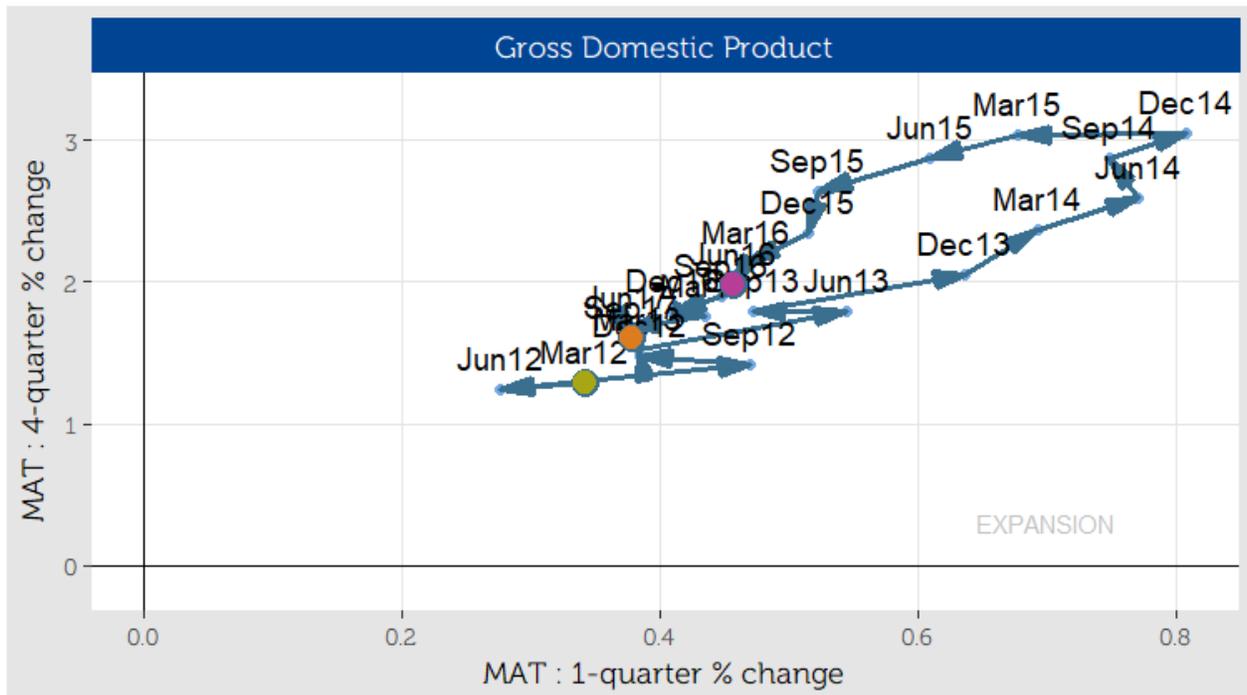

12.3 Exchange Rate (Euro)

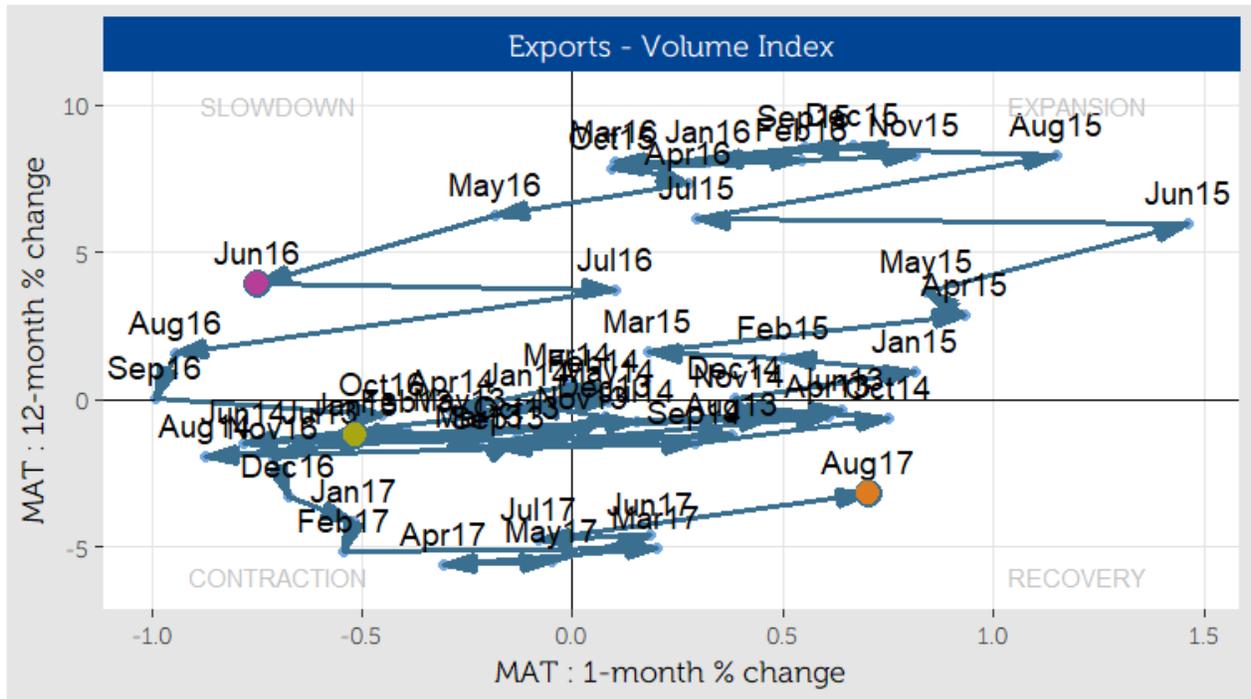

12.4 OECD Composite Leading Indicator - UK

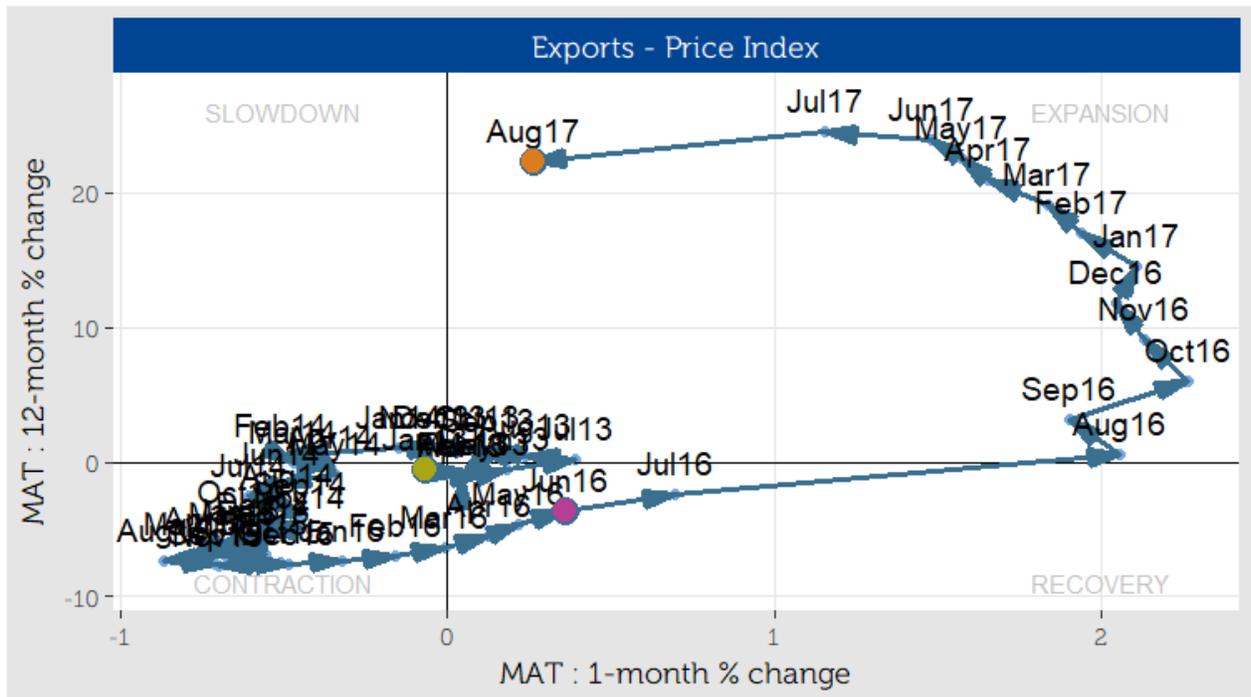

12.5 Gross Domestic Product - GDP (ABMI-PGDP)

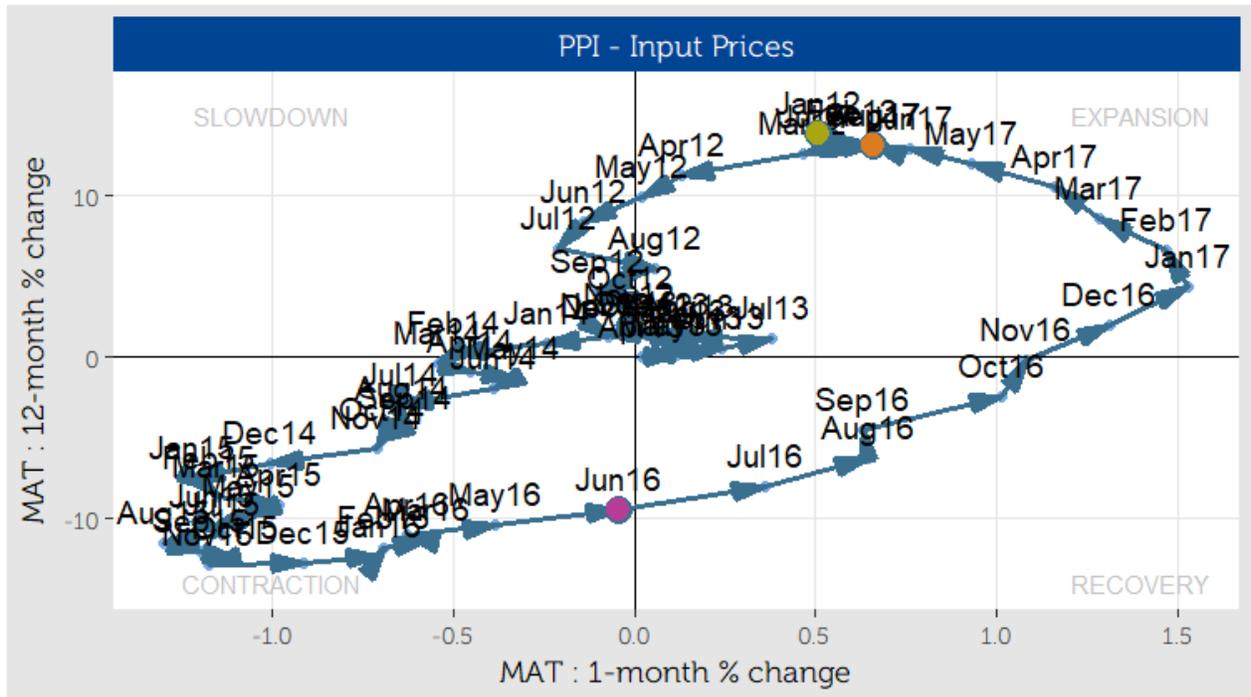

12.6 Exports - Volume Index (BQKU)

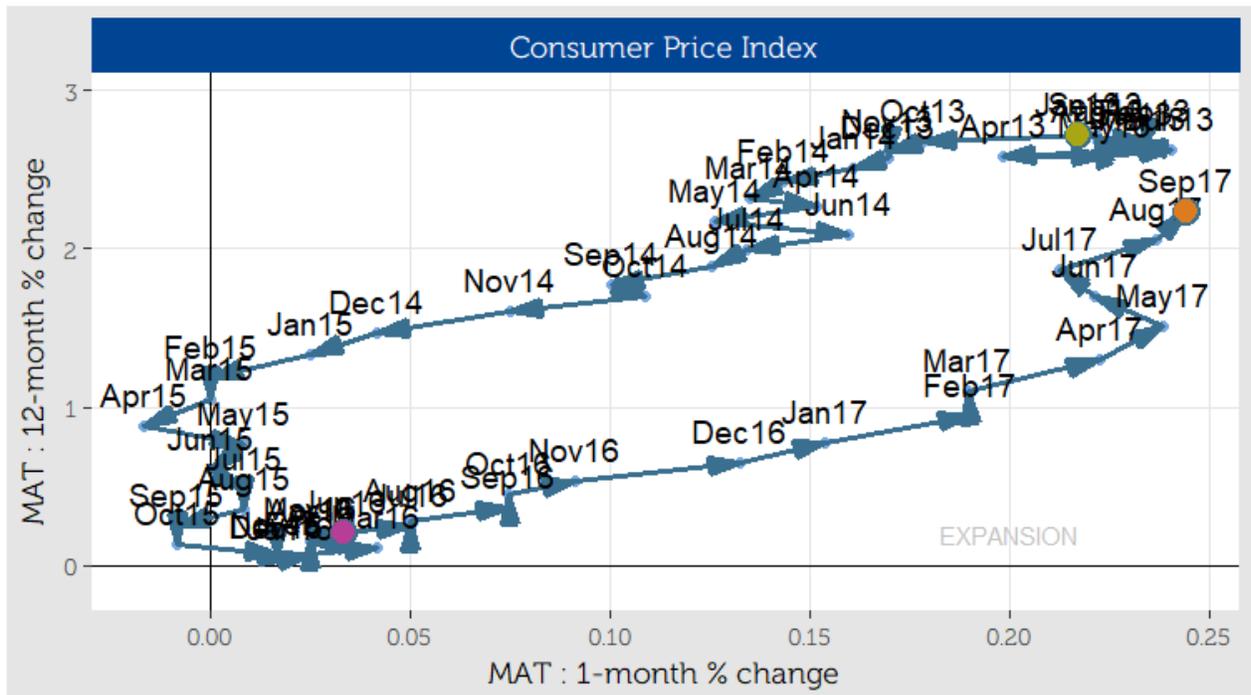

12.7 Exports - Price Index (BQKR)

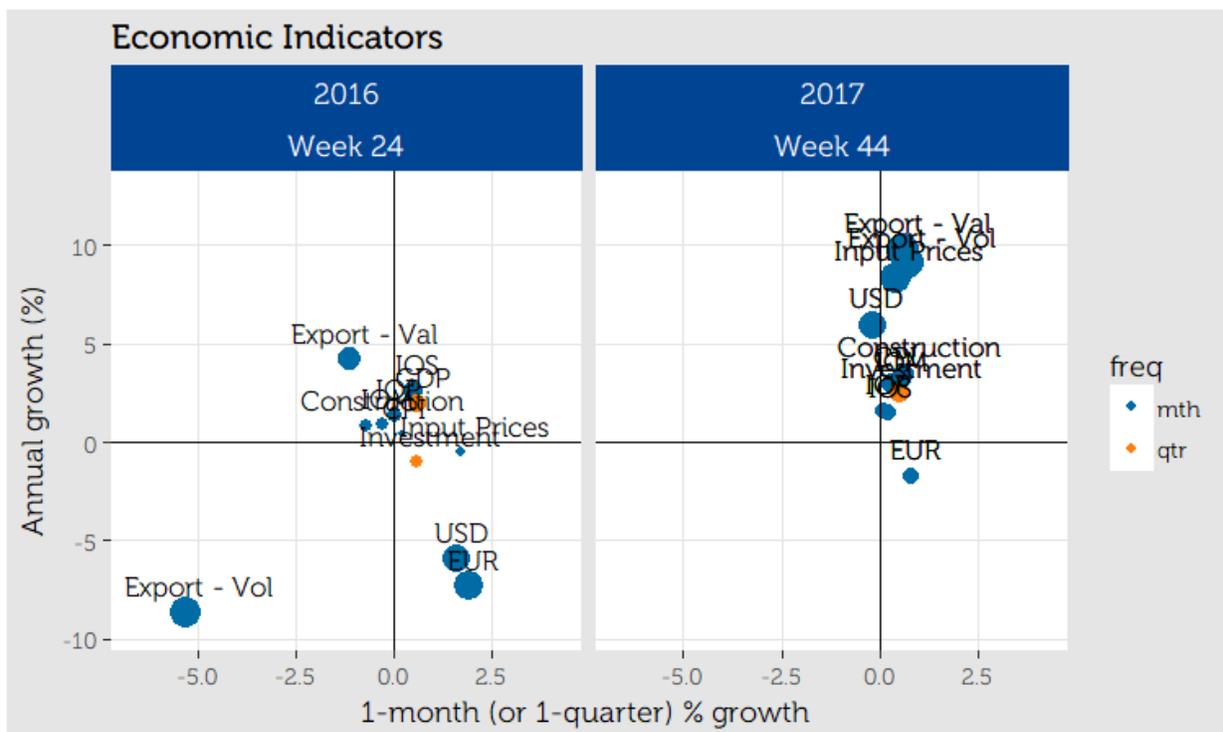

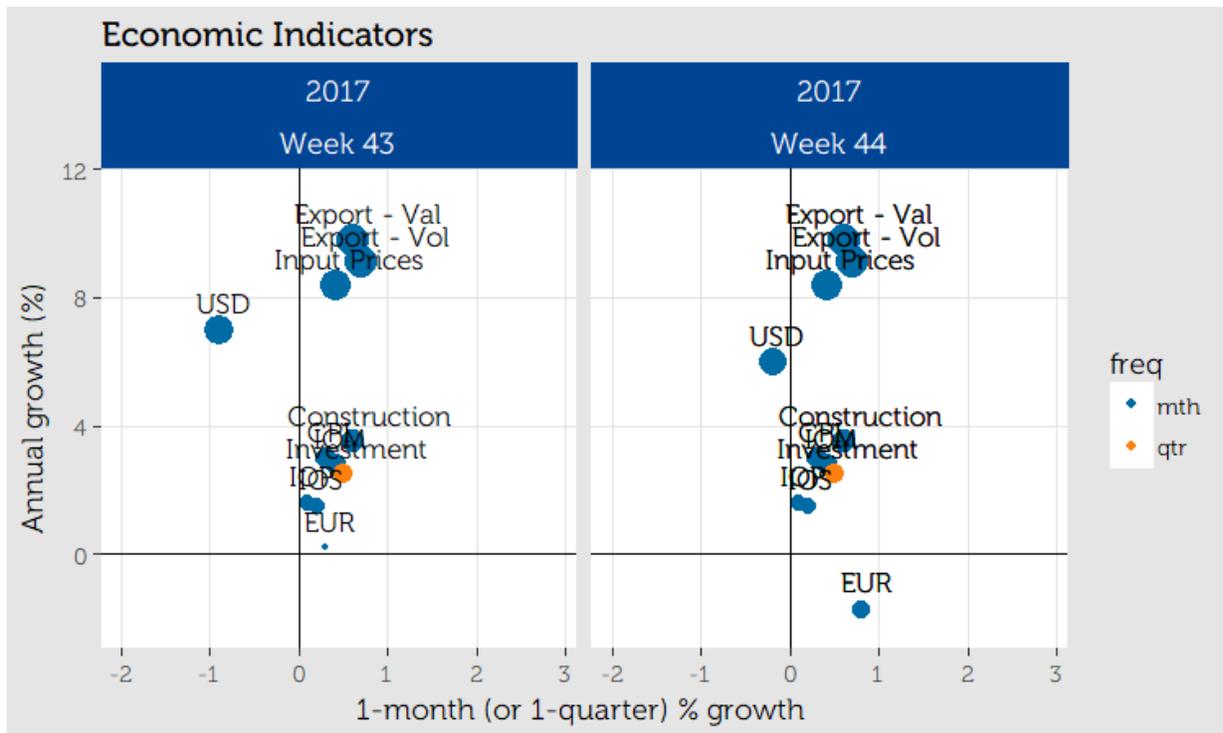

12.8 Input Prices (K646)

12.9 Consumer Price Index (D7BT)

12.10 Current State

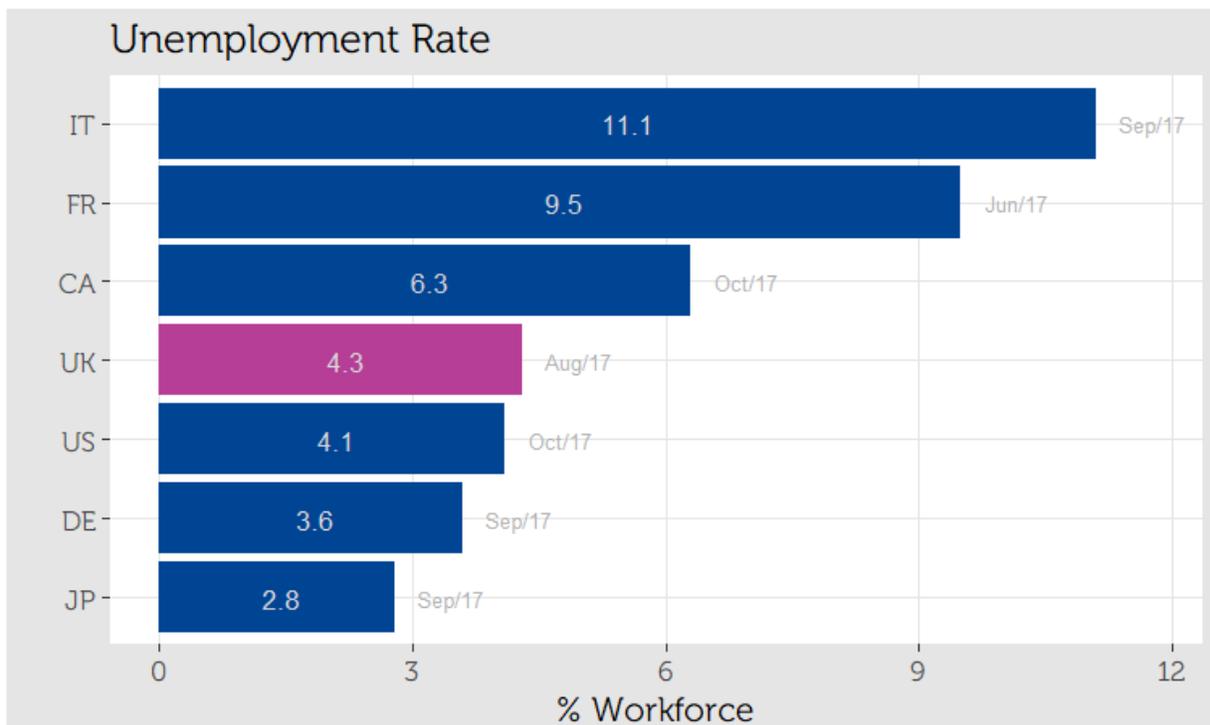

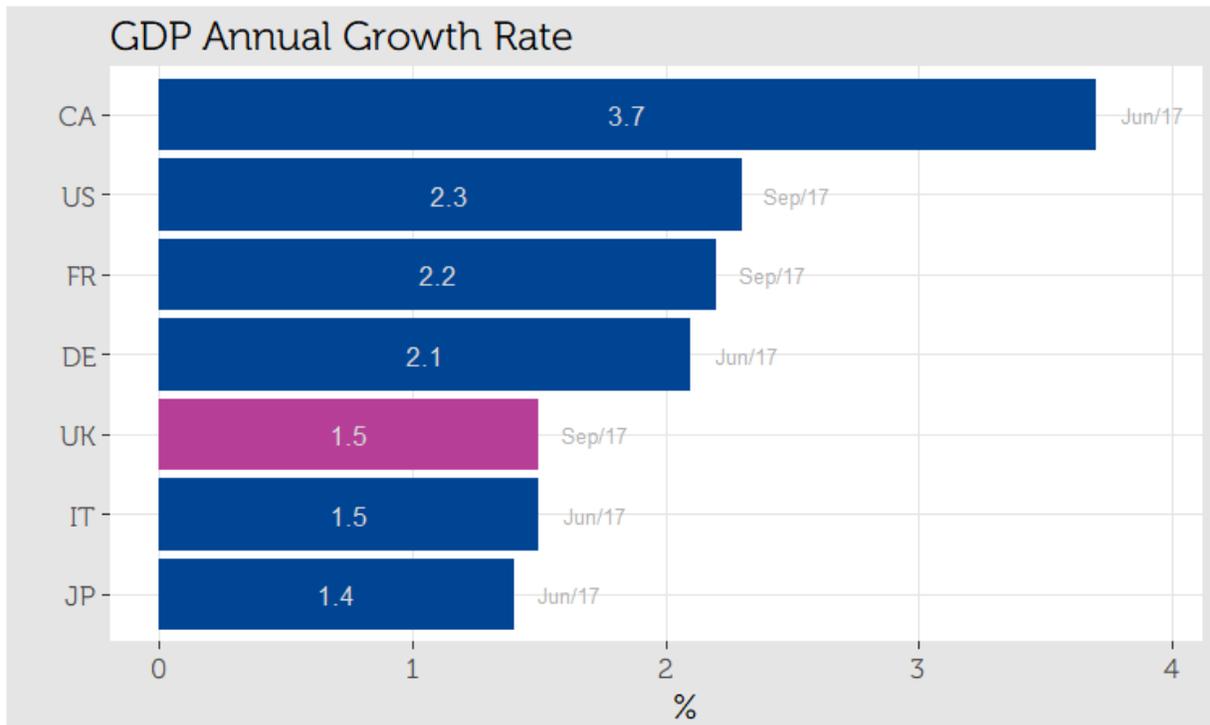

Top: Indicators growth - Current week versus previous week.

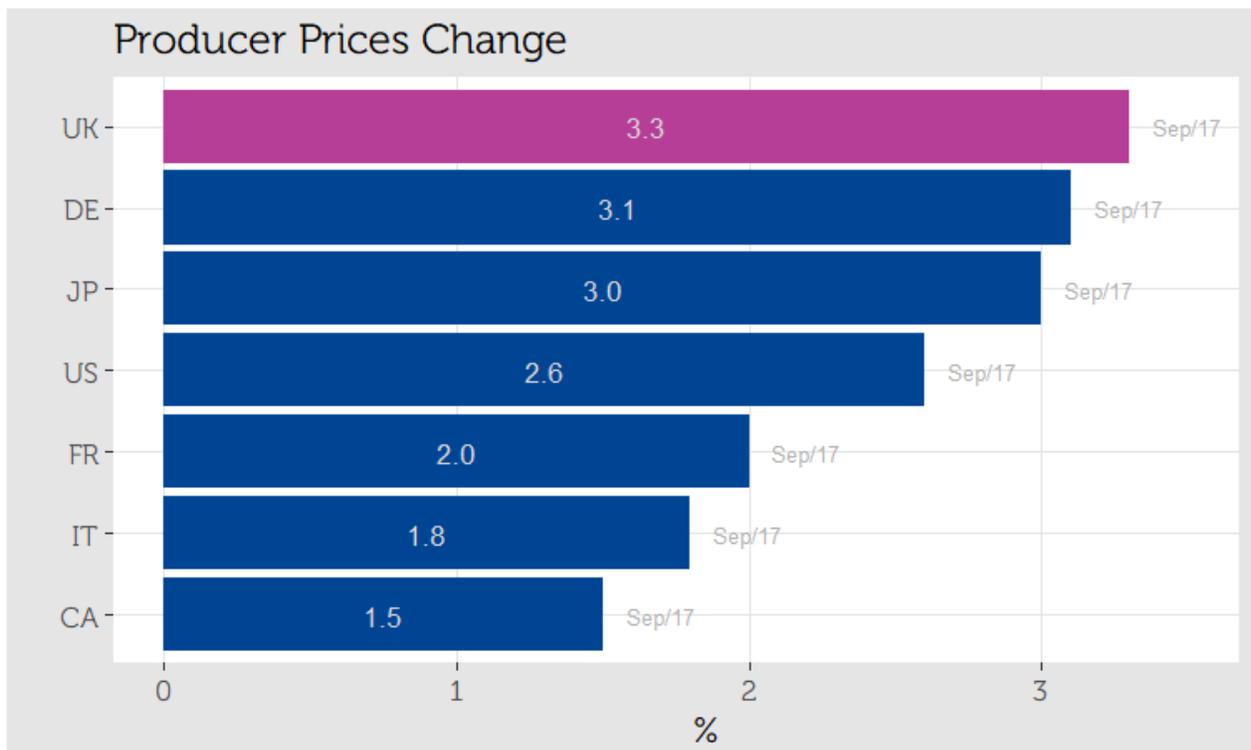

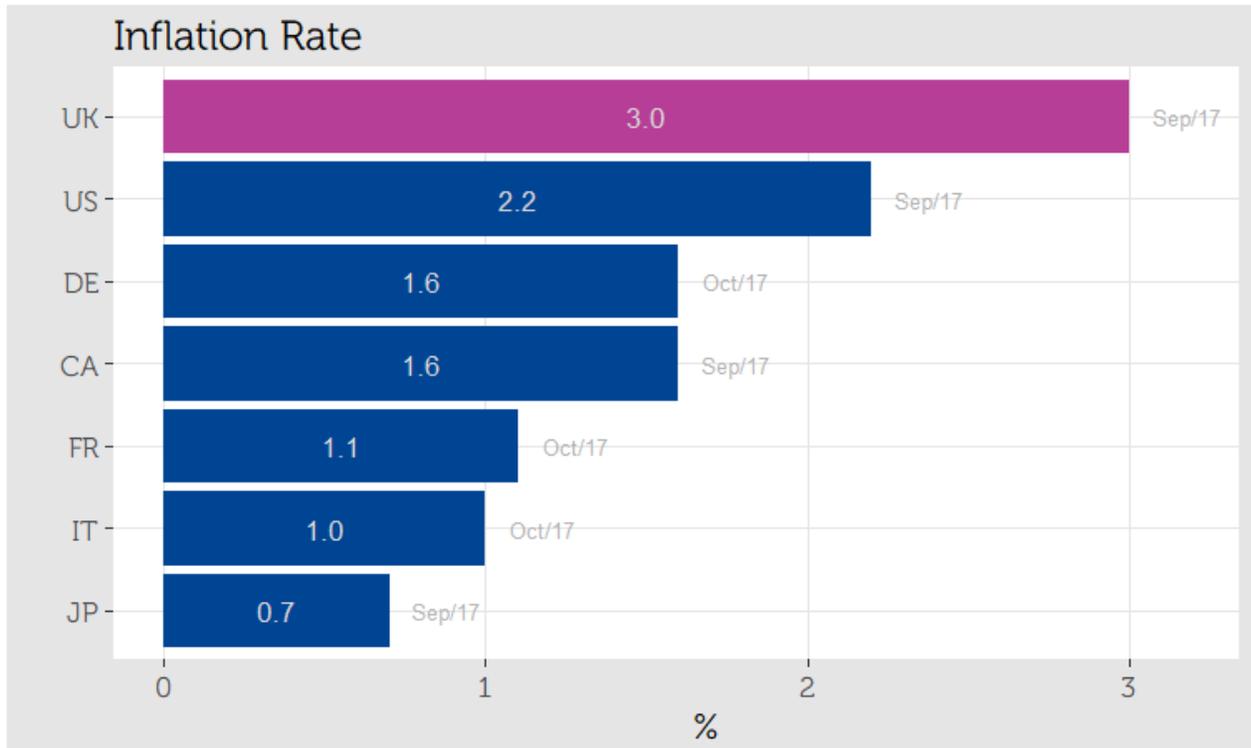

Bottom: Indicators Growth - Before Referendum vote versus current week

E Information about EURIS

EURIS is an advisory body for the potential impacts of the changing relationship between the UK and EU for the UK Government, manufacturers and media. EURIS members are industry trade associations BEAMA, GAMBICA, EAMA, REA, CESA, FETA and TechWorks, covering some 3500 companies across electrotechnical, electronics, renewables and mechanical engineering products. It has a focus on product manufacturers covered by the Single Market and the supporting regulations and standards. For more information on EURIS, please visit <http://www.euristaskforce.org>.

For further information on this report please contact:
