## **Future Energy Networks – Portfolio description**

The newly formed Future Energy Networks portfolio covers all the BEAMA member activities in electricity grids and metering. The grid technologies cover all types of electricity transformers, electrical switchgear, integration of renewable generation, grid automation, communications systems, cyber security, energy systems, DSO plus mandated smart metering equipment.

The portfolio manager will work closely with the portfolio manager for Flexible energy systems (connected homes, energy storage, EV and EV infrastructures, energy displays and customer energy management systems) under the direction of the Director Digital.

Current live issues include:

- Networks campaign on network investments for the low carbon future, and the essential role of the UK based supply chain.
- The replacement of SF6 gasses in network switchgear and associated strategy and engagement
- Cybersecurity of electricity networks
- Grid flexibility for demand side management and renewables
- Future networks and the DSO transition
- Successful roll out of mandated smart metering equipment in all UK homes
- Continued interoperability with mandated customer energy displays

The Portfolio includes representation in European groups, primarily T&D Europe

Applications should be emailed to [Andrew.willman@beama.org.uk](mailto:Andrew.willman@beama.org.uk) by the 6<sup>th</sup> December including a CV and Cover Letter. Any interested applicant is also invited to contact [Andrew.willman@beama.org.uk](mailto:Andrew.willman@beama.org.uk) to discuss the role.
