## BEAMA Group Stand at Middle East Electricity 2018

A design with excellent height and visibility for the branding, with a double height rear wall to 4.88m. The upper section will have the current GREAT Branding and the stylised flag (DIT permitting).

The stand design is open to enable exhibitors to maximise on their displays and the exhibitor names are printed on the side wall in a much larger font. We will provide normal name boards for any exhibitor who wants to put their display to the edge.

Lighting is provided by floodlights situated on the side walls – and downlights in the colour coordinated coping.

### General:

Construction of both options is flat wooden walling painted white. As with Option 2 the coloured elements of the stand can be black – blue, grey or to our client's preference\*. (An additional cost may apply for non-standard colours).

Carpet colour to be co-ordinated with the stand in grey or blue covered with a protective covering until the end of Exhibitor Day. (We strongly recommend light grey as it stays cleaner during the show, reflects more light and clients prefer it as it does not clash with their company colours!)

### **Individual Booth Specification based on multiples of 9 sq.m.**

- Name board
- 1 lockable counter
- 1 x 5 amp socket (1000w), (for charging laptops, mobiles).
- 1 table and 4 chairs

### **Other items included**

- Layout Plans prepared for Group Stands (once layout has been agreed by BEAMA )
- English speaking Project Manager
- Maintenance Staff on site for the duration of the show
- Technical drawings and Submission of Plans to the Organiser for approvals
- Ordering of power for lighting and power requirements (provided that final number of exhibitors is available to us before the power order deadline)
- Power consumption for lighting and mains power as specified in the schedule.

### **Items Not Included**

- Stand cleaning during the show days (we are no longer allowed to do this due to new rules by DWTC)
- Cost of water/Waste supply from DWTC
- Internet and other communication lines from DWTC
- Any surcharges for late orders for power which may result from exhibitors joining the group after the power deadline has been passed.
- Hanging costs for suspending banners from the hall ceilings
- Exhibitor's special power requirements for power and compressed air
- Assistance with unpacking, installation or hanging of exhibitor exhibition materials.
