3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: Businesses sanctioned do not pay penalties	3. In your experience what makes it difficult for a surveillance authority to take action against non-compliant products traded by businesses located in another EU Member State?: In particular in the case of goods traded online businesses contacted consider that they are not manufacturing, importing, distributing or making the product available on the market	4. National authorities in the EU Member States can currently exchange information on measures adopted to restrict the marketing of non-compliant products via several means (Rapid Alert System, notification procedures, common databases (ICSMS), expert groups, administrative cooperation groups). In your experience or knowledge in the relevant product category(-ies) how often do national authorities restrict the marketing of a product following the exchange of information about measures adopted by another authority in the EU against the same product?	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful to ensure that restrictive measures are adopted in other jurisdictions on the same basis as that way they can be effective in a larger part of the Single Market	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because the authority using information can be more efficient and focus its inspection on the specific product requirements likely to have been infringed	5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it useful because using the evidence gathered by the foreign authority on non-compliance allows time and cost savings

What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it unfeasible as many authorities are unlikely to have the resources to follow up on decisions by foreign authorities

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: More explicit obligations on economic operators to answer requests from authorities located in other EU Member States

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Specific procedures for mutual assistance among authorities of EU Member States

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Stricter obligations for EU authorities to respond to requests for mutual assistance by other EU authorities

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Possibility for EU authorities to ask other EU authorities for mutual assistance to sanction businesses located abroad that do not respond to their requests

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

Strongly disagree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Stricter obligations for EU authorities to respond to requests for mutual assistance by other EU authorities

Strongly agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Possibility for EU authorities to ask other EU authorities for mutual assistance to sanction businesses located abroad that do not respond to their requests

Strongly agree

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

Disagree

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it unfeasible as many authorities are unlikely to have the resources to follow up on decisions by foreign authorities

Strongly disagree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: More explicit obligations on economic operators to answer requests from authorities located in other EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Specific procedures for mutual assistance among authorities of EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: More explicit obligations on economic operators to answer requests from authorities located in other EU Member States

No opinion

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Specific procedures for mutual assistance among authorities of EU Member States

Strongly agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Stricter obligations for EU authorities to respond to requests for mutual assistance by other EU authorities

Strongly agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Possibility for EU authorities to ask other EU authorities for mutual assistance to sanction businesses located abroad that do not respond to their requests

Agree

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

No opinion

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it unfeasible as many authorities are unlikely to have the resources to follow up on decisions by foreign authorities

No opinion

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it unfeasible as many authorities are unlikely to have the resources to follow up on decisions by foreign authorities

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: More explicit obligations on economic operators to answer requests from authorities located in other EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Specific procedures for mutual assistance among authorities of EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Stricter obligations for EU authorities to respond to requests for mutual assistance by other EU authorities

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Possibility for EU authorities to ask other EU authorities for mutual assistance to sanction businesses located abroad that do not respond to their requests

Agree

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it wrong as the decision of the foreign authority may be based on an incorrect assessment

Disagree

5. What is your view about the possibility that a national authority uses information on measures adopted to restrict the marketing of non-compliant products by another EU authority to adopt restrictive measures against the same products supplied within its own jurisdiction? : I find it unfeasible as many authorities are unlikely to have the resources to follow up on decisions by foreign authorities

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: More explicit obligations on economic operators to answer requests from authorities located in other EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Specific procedures for mutual assistance among authorities of EU Member States

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Stricter obligations for EU authorities to respond to requests for mutual assistance by other EU authorities

Agree

6. Would the following mechanisms make it easier to contact manufacturers or EU importers located in another EU Member State?: Possibility for EU authorities to ask other EU authorities for mutual assistance to sanction businesses located abroad that do not respond to their requests

Disagree

7. Would you like to add any comments or suggestions on how to make it easier for authorities to contact manufacturers or EU importers located in another EU Member State?

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : More exchange of information and discussion among EU national authorities prior to final assessment on product non-compliance and corrective action so as to prevent diverging conclusions among authorities

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Stricter rules on follow up to restrictive measures adopted by other EU authorities

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Legal principles to ensure easy replication of measures taken by authorities in other EU Member States (e.g. portability of test results, presumption that products found to be non-compliant in Member State A are also non-compliant in Member State B)

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Procedure for the recognition of national decisions in other EU Member States

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Direct applicability of national decisions in other EU Member States

EU-wide cooperative enforcement and assistance would improve the quality of enforcement. Training and resources are necessary since the quality of enforcement varies widely between EU Member States. A suitably rigorous enforcement qualification might be useful to improve the current state of affairs.

Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : More exchange of information and discussion among EU national authorities prior to final assessment on product non-compliance and corrective action so as to prevent diverging conclusions among authorities	8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Stricter rules on follow up to restrictive measures adopted by other EU authorities	8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Legal principles to ensure easy replication of measures taken by authorities in other EU Member States (e.g. portability of test results, presumption that products found to be non-compliant in Member State A are also non-compliant in Member State B)	8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Procedure for the recognition of national decisions in other EU Member States	8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Direct applicability of national decisions in other EU Member States

What comes to the possible proposals concerning new obligations on economic operators to answer information requests, we would like to highlight that new regulation should not cause any new administrative obligations or costs to the economic operations. Especially, in order to ease SMEs' opportunities to do business, administrative procedures should be as simple as possible. In

Communicating in a language which is easily understandable is an important factor. If language remains a problem for the respective manufacturer/importer, the authorities from another Member State can contact their national counterpart in the country where the manufacturer/importer is located, as the intermediary.

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Direct applicability of national decisions in other EU Member States

The mechanism proposed relies on cooperation between national administrations. Despite the general obligation to cooperate among EU Member States, there is a low incentive for a national authority to act decisively against a non-compliant national company, for the following reasons:
•sanction will certainly cause immediate damage to the company, maybe lead to visible job losses, which can

It would be good to see authorities in their own member state doing something first, then co-operating with others as required. At present there is little market surveillance, so suppliers don't bother complying because they are unlikely to be found out.

We are for a better EU organisation and efficiency for all MSA activity. At the same time there are several concerns on how to handle it and ensure correct judgement for possible non-compliant products. If one MSA defines a product to be non compliance and another MSA disagree or the manufacturer provides materials that shows compliance. Maybe a MSA council that judge if a issue is

In our view the already established platforms RAPEX and ICSMS give already now the possibility to exchange information and thus enable MSAs of one member state to use information another member state provides for. However, the information used should always be checked for plausibility, but this is also already required in the NLF directives.

7. Would you like to add any comments or suggestions on how to make it easier for authorities to contact manufacturers or EU importers located in another EU Member State?

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : More exchange of information and discussion among EU national authorities prior to final assessment on product non-compliance and corrective action so as to prevent diverging conclusions among authorities

Strongly agree

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Stricter rules on follow up to restrictive measures adopted by other EU authorities

Strongly agree

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Legal principles to ensure easy replication of measures taken by authorities in other EU Member States (e.g. portability of test results, presumption that products found to be non-compliant in Member State A are also non-compliant in Member State B)

Strongly agree

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Procedure for the recognition of national decisions in other EU Member States

Strongly agree

8. Do you agree that the following mechanisms would increase the effectiveness of market surveillance in the Single Market? : Direct applicability of national decisions in other EU Member States

Disagree

These suggested mechanisms rely on the proper training and qualification of those involved. For that reason, until there is equity in the qualification and/or training of enforcement officers, they may well create uncertainties in the market and unreasonable burdens on economic operators.

2. Are products in your sector imported from non-EU countries affected by non-compliance?

One of the most common barriers to enforcement measures is the time and cost of pursuing legal sanctions against a suspected non-compliant product/dealer/supplier. The time and cost is extremely prohibitive and MSAs must be absolutely certain to pursue a case - which is not often the case. These costs are on top of the already very expensive procurement and testing costs.

As the Commission has stated, there are indications that the level of knowledge among SMEs and especially micro businesses about harmonised rules applicable to industrial products is not always very high. As it is stated on the background document, the first step for regulatory compliance is that businesses have to be aware and understand their obligations under applicable legislation. We share the

Authority of market most affected by non-compliance

The difficulty of having Member States cooperating on market surveillance is a typical situation where each Member State attempts to free-ride the efforts made by the others, in a so-called "prisoners' dilemma" where the immediate interest of all players is to cheat, even if all end up seeing their situation deteriorated by this lack of cooperation. The path of mutual cooperation between Member States may thus be

First authority opening a case

We strongly recommend to allow manufacturers and economic operators to use a website address instead of the the physical address on the product or on the documentation when this web page allows to quickly find the physical address in an EU country. We also recommend allowing more than one single contact address. Main objective is to allow a quick contact between authorities and operators in case of

different elements should be taken into account : certainly the special expertise of the authority but also important to take into account is language, this to avoid unnecessary translations of documents (translations mean not only costs but also additional time). If this is present at the authority of the Member State of the manufacturer or importer this would be ideal.

Other

same as above

The only solution to make market surveillance effective is having 1 authority for the complete single market and not 28 (+) authorities as is currently the case. So one on one instead of one on many.

We believe that if a national Member State Authority (NMSA) takes a decision on a product which is marketed all over Europe, then authorities in other member states ought to use this decision to make their own evaluation on their own territory, as is currently the case further to a RAPEX notification. We would support the idea of nominating a lead authority for that purpose in the very same country where the

The concept of a lead authority is good in principle provided that a consistent level of expertise is provided across all Member States. Confidence in the system would be undermined if a notified, lead authority was not properly resourced to take account of EU-wide implications.

Wow. You want a "consumer" to be answering these questions? Do you have any idea how little the average consumer would understand the above questions? For people "skilled in the art" these are deep questions. Centralised sharing of data will help. Common rules on "sanctions" will help. Direct application of sanctions simultaneously across the market will help.

Market surveillance officers require more specialist knowledge in order to be more targeted and effective in policing the marketplace. It analogous to Police Forces - they have specialised groups providing back up and specialist support, the same is required for market surveillance but not need for Armed Response Units!

2. Are products in your sector imported from non-EU countries affected by non-compliance?

Special expertise of authority

More surveillance and heavier penalties. Authorities in some EU member states use the excuse of low funding and poor resources for not applying effective surveillance. This is just an excuse, as more surveillance and heavier penalties would allow better and more effective execution of surveillance responsibilities. Also a centrally coordinating body within the EU, with powers to implement

In the case of a product subject to type-approval, it should always be the member state that issued the approval. In other cases, the lead authority should be that with the most expertise or the most affected by non-compliance.

Other

In the case of a product subject to type-approval, it should always be the member state that issued the approval. In other cases, the lead authority should be that with the most expertise or the most affected by non-compliance.

Please consider the market surveillance activities needed already when writing directives / regulations. Market surveillance authorities need to be considered in the legislative process. Stricter limits should only be imposed if they can be controlled by market surveillance.

First authority opening a case

Simple action such as checking the CE declaration and the content of the instructions manual for the mandatory requirements would be beneficial and show the manufacturers that market surveillance is under control. No need of testing facilities and deep technical knowledge of the product categories.
Associated with more exchange of information between Member States

EU should establish their own "batch production compliance" control system together with EU notified body who has local business in non-EU country. that's the most effective way to got the first hand non-compliant information and evidence of take penalty and actions.

the present CE New Approach and directives did not give more attention to batch production compliance control. Actually this critical negligence causing lots of unfair market competition to EU local factory, higher sourcing quality control cost to EU retailer and serious product safety headache for EU consumers. I suggest having a system revision to present New Approach conformity assessment

Generally it's good. but it did not touch the most important part of product compliance: Does the present conformity assessment module of EU New Approach is effective or not? please remember, all non-compliance product must use the gap of fault conformity assessment module.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Legal action against non-EU traders is not realistically achievable. In most cases in the toy and general consumer product sectors, including on-line sales, it should be possible for all traders to designate and EU economic operator who is responsible for product safety and technical documentation and against whom sanctions can be imposed when non-compliance occurs.

Training and qualification of surveillance personnel is important to provide an effective system which is free from uncertainties. In some sectors there is a wide disparity of knowledge between one Member State and another. This leads to poor trading conditions, consumer concerns and an escalation of restrictive measures without a significant improvement in consumer safety.

Question B4.2 relates to contact between authorities and businesses in different member states. In my opinion a simple cooperative system between the enforcement and "home" authorities is usually applied and works effectively in the toy and consumer goods sectors.

Whilst the toy and consumer goods sectors attract a lot of attention (for understandable reasons), the

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

The communication and negotiation of goods entering the single market should be undertaken by a dedicated pan-EU body. Most member states are simply not able to deal with 3rd parties, and are not effective enough at detecting and pursuing non-compliance in products from these 3rd countries.

Another key issue is the setting up of companies in order to produce and build

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

Very relevant and covering the most important areas and issues facing market surveillance.

Hvis ikke virksomheden svarer og fremsender de i lovgivningen krævede oplysninger, har vi allerede hjemmel til at gribe ind overfor produkterne.

En effektiv kontrol af varer fra tredjelande kræver at alle medlemsstater udøver grænsekontrol overfor bestemte produkter som udgør en konstateret risiko. Ellers vil varerne komme ind i EU via lande som ikke udøver kontrol.

Ja, bestemt. Markedsovervågningen er begrænset i alle lande i forhold til det enorme antal produkter der omsættes, bl.a. via on-line handel og fra lande uden for EU. Undersøgelsen kan give et billede af hvordan interessenterne ser på problemets omfang og de forskellige løsningsmuligheder.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Der wichtigste Multiplikator für die Wirksamkeit der Marktüberwachung ist der Einführer selbst, der für eine Erfüllung seiner Pflichten jedoch - bei meist deutlich vielfältigerer Produktpalette - über ähnliches Wissen wie die produktspezifischen Hersteller verfügen muss. Die Ausweitung von Definitionen oder die Verschärfung von Sanktionen würde insofern nicht diese wesentliche Ursache für einzelne nicht

Die deutliche Mehrheit der Wirtschaftsakteure hat größtes Interesse an einer Einhaltung der Vorschriften, somit eignen sich gerade die Wirtschaftsakteure selber als Multiplikatoren für eine wirksamere Marktüberwachung. Eine wirksames Mittel wäre somit deren bessere Unterstützung bei der Identifikation und Anwendung von Vorschriften. Beispiel: Die IHK Bodensee-Oberschwaben stellt für

Die Fragestellungen sind offenbar stark von der Annahme geleitet, dass Verstöße gegen die Vorschriften zu einem großen Teil vorsätzlich erfolgen. Uns erreichen jedoch fast ausschließlich Beratungsanfragen von - meist kleinen und mittleren - Unternehmen, welche schlicht nicht über das erforderliche Wissen verfügen, um die Anforderungen sowie das

What comes to the market surveillance actions, we highlight the fact, the regulatory framework and market surveillance should definitely create a fair level playing field between the business located in EU countries and non EU-countries. In other words, regulatory obligations and administrative burden should be similar regardless whether the business is located in the EU or outside the EU. Thus,

As a conclusion, we would like to highlight the importance of the market surveillance system on ensuring that industrial products placed on the single market guarantee high levels of protection for health and safety and the environment and also ensuring the free movement of industrial products in the single market.

This is an utmost importance especially for the SMEs. Moreover, we share the same

The Federation of Finnish Enterprises warmly welcomes this consultation and we appreciate the Commission's aims to improve and modernize market surveillance system. We hope our comments help Commission to further develop this important matter.

When it comes to the forthcoming consultations, we kindly hope that the

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

We only filled out part B1; in this part the questions were, indeed, relevant to the cosmetics industry where the market surveillance system works well. We could, however, not answer the questions related to market surveillance authorities' resources. These may vary from Member State to Member State but by and large they do seem able to carry out their role.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Strongly agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

Strongly agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

Strongly agree

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

The questions are really good and we hope it will help for the EU commission to understand the issues in the different EU countries and possibilities to make the market surveillance more effective.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Agree

6. Consultation of manufacturers, trade or industry associations active in a given product field may prove helpful in identifying non-compliant products.

Optimisation and cooperation with stakeholders that operate schemes that could support market surveillance. For example voluntary certification schemes that comply with given criteria (for example Module H, or ISO 17000 series) could prove useful in pointing towards non-compliant products.

Minimum criteria for laboratories would be useful, for example being accredited

The questions are of a general nature. Depending on the industry or sector involved different response can be expected. This would be most visible for consumer goods and B2B products.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Fast reaction when non-compliant products are found and better cooperation not only between the market surveillance and customs authorities in a Member State but between authorities in different Member States are key for properly detecting and acting against non-compliant products originating from non-EU countries.

Better communication between the customs and market surveillance authorities and also a regular dialogue between authorities and economic operators can help improve responsiveness and effectiveness of market surveillance.

The questions are sensible to assess the current situation, but some of them can lead to multiple interpretations. Changes in the market surveillance framework must be effective without adding additional layers of administrative burdens for compliant manufacturers. As regards the question B4-8, we would like to comment that in the case of extra-territorial decisions on

The joint efforts, studies, training, and info-sharing between the EU-commission, national authorities and specialised agencies (mainly EUIPO and OLAF) are very good.

However, as we have highlighted in previous surveys, we find that private sector co-operation falls behind. Support by the EU Commission/public authorities to achieve joint

Increased support to businesses seems important, and should be at the core of the market surveillance authorities' mission.

The overall aim should be to prevent non-compliance.

There is too little collaboration between the private and the public sector. It seems that business are sometimes wary of turning to authorities for advice, because they have

The questions are relevant.

However, we find some of them way too complex and with cumulative criteria for the "question format" you have. It is sometimes almost impossible to agree or disagree with, or say yes or no. We suggest easier and questions that are suited for your "question format".

The possibility to leave comments is really great!

A particular problem in our sector is the trade in non-compliant goods via auctions. The auction company claims not to be placing the goods on the market but is deliberately unhelpful in identifying those that are. Legal certainty on the responsibilities of auction companies and other operators is essential.

The key missing element is commitment. Many high-value products have been imported in our sector, primarily via auctions. The authorities in our sector have been informed of non-compliant products and have been pressed strongly to take action in order to ensure no unfair economic damage is done, and also to enforce EU controls on engine emissions, noise emissions and machinery safety. The

Strongly agree

Strongly agree

In a nutshell, we identified a need for a harmonised approach in the EU towards this issue.
Regarding B5Q5, we believe that if the authorities are properly empowered, then this should not arise as an issue provided that without legal representation in the EU, the products should not be imported. Nevertheless, there is also a growing reality that any EU consumer has the ability to buy products via

Although the questions are very much relevant, we did notice some inconsistencies in the wording.
Examples: B3, Q1 - the first line excludes the second while the third excludes the fourth. B2, Q4 - as the first line uses the word 'exclusively', the wording seems a bit contradictory to us regarding the rest of the additional foci of the national authorities concerned in the question.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Strongly agree

Strongly agree

There is a need for better and smarter cooperation not only between competent authorities, but also between competent authorities and business operators: this will allow to better apply the risk-based principle and enhance the efficiency and effectiveness of the surveillance systems. In this respect, when determining the frequency of the controls, operators' record of compliance (earned

- Better public - private cooperation
- Better risk - based approach
- More harmonised testing and analytical methods, more harmonised risk assessment procedures
- European market Surveillance forum.
- Authorised representatives

Due to the different situations or causes which lead to non compliances, it has proven difficult to form a clear opinion on some questions. For example, questions focus on compliance for products for which there is harmonised legislation. An overall product safety framework for all (non-food) product is still missing. No clear differentiation is made either between dangerous non-compliant

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

Agree

Agree

Agree

In this situation, we suggest that:
1.The investigating market surveillance authority consults trade associations representing EU manufacturers that are selling the same type of products (intelligence gathering).
2.The legal person exporting to the EU (exporter) should be requested to affix his name and address on the product or its packaging, as is

Where market surveillance authorities do not have testing laboratories in their country, European companies could make available their facilities for them.

Although the Commission's standards of consultation have improved in recent years, we remain concerned that consultation procedures are still often neither simple enough nor targeted enough. Some questions are not easy to understand or could elicit different types of answers, depending on whether you have in mind to address the behaviour of rogue traders versus those responsible of minor or unintentional cases

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Fast reaction when non-compliant products are found and better cooperation not only between the market surveillance and customs authorities in a Member State but between authorities in different Member States are key for properly detecting and acting against non-compliant products originating from non-EU countries.

The questions are appropriate. Changes in the market surveillance framework must be effective without adding additional layers of administrative burdens for compliant manufacturers.

6. Auctions are a real problem in the UK. The auctioneer claims not to be placing the product on the market but just acting as an agent between the seller and the buyer. The seller is not present at the auction and no action has been taken by the authorities. The power to "ban products when businesses contacted do not reply or when they cannot be contacted" should allow the prevention of sales of non-

The problem appears to be mainly a lack of commitment by the market surveillance authorities, rather than lack of powers or resources. Authorities have been informed many times of specific products and exactly where they are being placed on the market and what the non-compliance is. No substantial action has been taken.

Mainly appropriate but the products in our sector are high value capital assets for professional use. The sales of compliant machines are usually through dealers, the sales of non-compliant machinery are either through auctions (most commonly) or private imports.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

Agree

Agree

Strongly disagree

The questions are very detailed and relevant but some more technical could probably be necessary to provide a clear understanding of the market.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Strongly agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

Strongly agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

Strongly agree

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

There should be close relationships between Governments, Market Surveillance authorities and industry, along with more resources for authorities.

1. What do you think about the relevance of the questions?

Questions were mostly relevant, though some were more relevant for market surveillance authorities to answer.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

Upfront proof has to be supplied before a shipment enters the EEA

1. What do you think about the relevance of the questions?

Rather relevant. The main problem however is the lack of market surveillance in the first place.
With some exceptions like the MDD this is the main problem.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)	6. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?	1. What do you think about the relevance of the questions?
Strongly agree	Strongly agree	Strongly agree	It would need an improved Declaration of Origin for customs procedures to battle non compliant Conflict Minerals declarations since many importers rely on fake declarations.	It is almost impossible to solely rely on the market surveillance bodies. There must be more private sector involvement under a cost and burden sharing scheme: I would link it much stronger to EMAS III or EMAS IV (revised) requirements that companies strengthen their incoming goods inspections for supplied products. I also see a close link to ISO 14001, ISO 9001 and ISO/TS 16949 requirements to abide	The questions are highly relevant. Just that they create some response set due to their monotonous design is something that I would like to have improved.

Where the company "selling" a product online is based outside EU jurisdiction but those goods are handled by a "freight forwarder" then that logistics and shipping company should be designated as the "importer". Whoever carries the goods into the EU is the "importer" if no one else is named as the official importer. We need to close these loopholes.

Information sharing is the key.

I stated it earlier; as someone involved in product compliance this is relevant and I understand most of the questions. But for an average consumer who just wants to be sure that the products they are buying are safe and of reasonable quality (long life) then they would have almost no clue what you were asking in most cases.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Disagree

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

More focus about the purpose of the EU directives.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

No opinion

Agree

More border controls and synchronised between MS

more and better coordination between MS, if we are one market we should not act independent from other MS

Sometimes too much black or white alternatives. Different type of manufacturer have different possibilities to provide answers to a MSA and might even not understand what they ask for or how to request the material from the supplier

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)	6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)	6. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?	1. What do you think about the relevance of the questions?
Strongly agree	Strongly agree	Strongly agree	Withdrawals and sanctions should be applied faster. There are cases where products cannot be traced as they are "one shot" imports.	Place a first priority in efficiency of the MS on their own territory by encouraging improvements with stakeholders (public/private cooperation) and financing by sanctions.	Not sufficiently aimed at efficiency at national level.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

No opinion

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

the existing concept of an authorised representative within Europe appointed in respect of the MD and IVD device directives is a nonsense as from a liability perspective, they have none. So, in its current form, it's useless. Import bans are far more effective.

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

Comprehensive and pertinent

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

6. Exchange of information with the authorities of the country of origin. Obviously the EU has no jurisdiction in a non-EU country.

Improved training and expertise or at least access to expert advice. How about a consumer safety help desk for enforcement officers?

A few were not relevant for me to offer a reply e.g.B5 Q 5
Also B4 Q5 4th response was not correctly phrased.

6. 8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

Better, more, coordinated surveillance with each authority reporting centrally product categories compliance levels! Unfortunately we can go round and round discussing this, but if national authorities do not take their role seriously, avoid influences by economic operators, it's like having traffic rules enforcement authorities without policemen out checking and enforcing

1. What do you think about the relevance of the questions?

Very relevant and should allow a better picture to emerge

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Strongly agree

6. No opinion	No opinion	Agree	A fast/ prompt reaction is the critical factor for the success. In our experience when non-compliant product are sold just in the amount of "one container" after they are sold the action are irrelevant as the products disappear on the market / are already sold.	ask manufactures for support / exchange the experience & knowledge about the product specific details.	Questions make sense to evaluate the situation and possible changes. The future changes must be effective with no administrative burden for the compliant manufactures. Some questions are seen as a little "tricky" and can be understood in one way or the exact opposite.

Gegenüber Unternehmen in Drittländern können Sanktionen zwar verhängt, aber nicht wirksam durchgesetzt werden.

Getroffenen Maßnahmen müssen verhältnismäßig sein. Eine nicht beantwortete Anfrage rechtfertigt nicht per se das Verbot des erstmaligen Inverkehrbringens von Produkten.

Wie zuständige Behörden in Drittländern die bei Ihnen ansässigen Unternehmen zwingen oder bestrafen, ist aus h.S. Sache der Drittländer.

Die Fragen sind relevant, jedoch scheinen Sie z.T. teleologisch ausgerichtet zu sein. D.h. es wird zielgerichtet nach Maßnahmen gefragt, die bereits in den Ansätzen des New Legal Framework enthalten sind.

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

1. What do you think about the relevance of the questions?

Most questions assume that market surveillance in the member states is working insufficient.

The surveillance of consumer near products in Germany is working properly although we would wish to be informed better about European results of European working groups. The communication structure should be improved.

In my opinion the relevance

6. Op 25 april 2016 publiceerde de Europese Commissie nieuwe cijfers over de RAPEX database, die notificaties van gevaarlijke producten op de Europese markt registreert. De data laat zien dat er in 2015 meer dan 2000 notificaties van gevaarlijke producten waren. Een van de belangrijkste conclusies die de Commissie uit de data trekt is dat een belangrijke uitdaging de directe private import van

De nadruk van de consultatie ligt op de conformiteit van producten met geharmoniseerde productwetgeving. Echter, een algeheel kader voor productveiligheid voor alle (non-food) producten mist nog.
Het is noodzakelijk dat competente toezichthouders beter en slimmer samenwerken met commerciële bedrijven, om zo

Ja, maar het is onmogelijk in de vragen om een onderscheid te maken in de bevoegdheden die de toezichthouders al hebben in de verschillende lidstaten.

6. 6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

7. Would you like to add any comments or suggestions on how to help to take action against non-compliant products traded by businesses located in a non-EU country?

8. Would you like to add any comments or suggestions on how to help to improve the effectiveness of market surveillance in the Single Market?

1. What do you think about the relevance of the questions?

Strongly agree

Strongly agree

Agree

What makes it difficult to take action for the Authorities is the complexity of the market. That is why a list of a product models per operators would be very helpful for example

More effective view of fines and also more frequent withdrawals from the market.

no comment

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU by customs (e.g. more exchange of risk information, alignment of measures)

Agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU between customs and market surveillance authorities (e.g. common risk profiles, seamless workflow)

Agree

6. In your experience or understanding would the following options help in taking action against non-compliant products traded by businesses located in a non-EU country?: More coordination of controls of products entering the EU (as in the previous option) targeting specifically products purchased online (e.g. via a pan-European Task Force of national authorities)

Investigate what is done in other countries or areas of the world. Eurasian countries, CC number in US, TAREKS in Turkey, CCC in China, ...

A stronger organization to avoid non compliant products to be imported from non EU countries would help the European industry. Once they are in the EU, they can circulate easily and be distributed. At this step, it is more difficult to tackle them.

good

No

No

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

The question of the legal qualification of deliberate non-compliance should have been raised. This is explicit cheating, with potential harm to health & safety of the user (consumer or worker), and with certain harm to the jobs, livelihoods and professional security of workers in honest companies. This is no menial infringement to law, with a threat to a public good (the confidence in the intrinsic qualities of an industrial

Nein.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

To convey our message we will also forward our responses to the Commission in the form of a letter. Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

Questions about RAPEX and Yes
its functioning and
usefulness.

Questions about the risk
profiling of economic
operators and how this might
be used to make enforcement
activities more effective and
efficient.

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

Questions on the effectiveness of public-private partnership between market surveillance authorities and industries to improve market surveillance.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

The EU Commission proposal for a new Consumer Product Safety Regulation and a Market Surveillance Regulation contains valuable proposals on how the traceability of products can be improved, i.e. through adding a batch, type or serial number and through mentioning the name and full address of the manufacturer and importer on the product or its

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

no.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

The key missing element is how the authorities of the member states can be more effectively forced to carry out their responsibilities under EU law. We do not believe that the problem is related to knowledge, resources or finance - these can be solved with sufficient motivation - but the lack of commitment to enforce the law. Clear contravention of the law has consistently been allowed to continue without any penalty

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

Not at this point.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

Questions with tick boxes should all allow opportunities to explain reasons for the option chosen. Alternatively there should be opportunity to submit a more detailed response in some of these areas separately.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

No

No

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

No

No

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?

Yes, for example for the compliance of the directives from products covered by them and not controlled. It's not logical to control only CE marked products, when products are entering on a market covered by a directive and not complying.

Yes

2. Were any important questions missing?

3. Can the Commission staff contact you (e.g. for a short telephone interview) to improve our understanding of your answers?
