

BEAMA Annual Conference

From Industrial Strategy to Industrial Growth

Thursday 4th December 2025

Book your tickets today!

Thursday 4th December 2025,
One Great George Street,
Westminster
10.00am-16.00pm

Conference Programme

As the UK Government's Industrial Strategy approaches the six-month mark since its publication in July 2025 and BEAMA members and guests will be exploring the implications and actions that are ongoing and necessary to deliver its core electrification principles. BEAMA's 'Market Pulse' tracker provides the platform for exploring the progress in policy delivery and consumer behaviour that can stimulate the unlocking of the essential industrial investment required to 2030 and beyond.

9.30am-10.00am—Registration, tea and coffee

10.00am-12.00pm—BEAMA Annual Conference

10.00am—10.05am

Welcoming address: Yselkla Farmer, BEAMA CEO and BEAMA President Erika Wilson, Wilson Power Solutions

10.05am—10.15am

Keynote address

10.15am - 11.00am

Panel session: Can the current policy framework generate industry investment for growth and inspire consumers towards change?

11.00am— 11.30am

Fireside Chat – From Electrical Contracting to Electrical Engineering, can we deliver the capacity we need?

A programme for accelerating electrification will require significant skills capacity building in building services contracting and electrical engineering for upstream investment. Industrial growth is inextricably linked to the attractiveness of the sector for re-skilling and new entrants. Our panel will provide practical context and a progress report in the context of this critical pillar for growth.

11.30am—12.00pm

Fireside Chat - Are our buildings ready for the energy transition?

Accelerating electrification is not simply a matter of installing building services and transport infrastructure such as heat pumps, smart hot water technologies, batteries or electrical vehicle charge points. The layering of electrotechnical products into an existing building will require an assessment of our existing electrical systems; ensuring they can accommodate the increase in electrical loads which may also be unpredictable in their operating profiles. Our panel will discuss BEAMA's Building Electrical Systems dynamic modelling project and explore some of the challenges and solutions that will come hand in hand with the Government's growth plan.

12.00pm – 13.00pm

Drinks and Networking Reception

13.00pm – 16.00pm

Sit down Lunch and Industry Awards
