Weekly

BREXIT WATCH

Week 46

November 2017

Brexit Watch - Week 46

The weekly Brexit Watch report monitors the short-term UK macro economic indicators to assess the impact of UK decision to leave European Union on UK economy. The report also monitors indicators in 4 manufacturing industries, namely, Electrical (SIC 27), Electronic (SIC 26), Mechanical (SIC 28) and Fabricated Metals (SIC 25).

The emphasis of this report is to monitor what has happened as opposed to what will happen. All the data with exception to exchange rates and OECD Composite indicator come from the Office for National Statistics (ONS).

A vertical purple line on the charts marks 23rd of June 2016, the date of the referendum.

The main points at the end of week 46 in 2017 are as follows:

- ★ The month-to-date average of **Sterling** with **US Dollar** in week 46 fell by 0.4% compared to October 2017 average, but grew by 5.8% compared to November 2016.
- The first estimate of UK **GDP** growth in the third quarter of 2017 was 0.4%; equivalent to £488.9 billion and a growth of 1.5% compared to 2016 Q3.
- ★ **Unemployment** rate remained at 4.3% in the three months to September 2017; the lowest rate since May 1975.
- ★ **Input prices** dropped to 4.6% in twelve months to October 2017, lowest since July 2016.
- ★ **Consumer price index** grew by 3.0% in the twelve months to September 2017, unchanged from previous month.
- ★ **Index of production** rose by 0.7% between August and September 2017 driven by surge in manufacturing output.
- The **construction output**, at constant prices, rose by 1.1% to £12.6 billion in September 2017 compared twelve months earlier.
- **Retail sales volume** fell by 0.3% in the twelve months to October 2017.
- ★ **Exports** trade in **value** grew by 12.8% in September 2017 to £51.6 billion compared to twelve months earlier and **imports** also grew by 4.0% to £54.3 billion in the same period.
- Combined **turnover** of the four monitored manufacturing industries grew by 1.2% in August 2017 and 6.1% compared to twelve months earlier. In the 12-month to August 2017, turnover of **Electrical** sector grew by 8.4%, both **Electronics** and **Mechanical** grew by 7.3% and **Fabricated Metals** sector grew by 3.5%.

12 Growth Cycles

12.1 About Growth Cycles

Growth cycle, plots the annual growth of an indicator against the 1-month (or 1-quarter) growth. This put the indicator in one of 4 main quadrants:

- Quadrant 1: increased compared to previous month (or quarter) and also increased compared previous year - **expansion**
- Quadrant 2: increased compared to previous month (or quarter) but decreased compared to previous year - **recovery**
- Quadrant 3: decreased compared to previous month (or quarter) and also decreased compared to previous year - **contraction**
- Quadrant 4: decreased compared to previous month (or quarter) but increased compared previous year - **slowdown**

The direction or where an indicator is heading to is found by connecting indicator's position over a period of time. Majority of indicators have seasonal components which can sometimes obscure the underlying trends. Using Moving Annual Total (MAT) helps to remove this seasonality. Where MAT has been used instead of the actual indicator, the axis label is preceded by the 'MAT'.

This section shows growth cycle plots of 8 selected indicators. The starting points are marked with green circle (●); purple circle (●) for referendum date and orange circle (●) for the current state.

E Information about EURIS

EURIS is an advisory body for the potential impacts of the changing relationship between the UK and EU for the UK Government, manufacturers and media. EURIS members are industry trade associations BEAMA, GAMBICA, EAMA, REA, CESA, FETA and TechWorks, covering some 3500 companies across electrotechnical, electronics, renewables and mechanical engineering products. It has a focus on product manufacturers covered by the Single Market and the supporting regulations and standards. For more information on EURIS, please visit <http://www.euristaskforce.org>.
