

BEAMA Group Stand at Middle East Electricity 2016

Stand Construction

The total height of the stand is 4 metres – with an available area of 2.5m high for exhibitor displays and graphics as per the design above. The upper structure will have the “GREAT” logo (or alternative design from the client).

The walls of the booths will be constructed from custom (wooden) panels finished in white. Each booth will have a low level vertical feature “as per the visual” at the front edge of the and the UK flag design and a name board.

Flooring for the entire stand area will be finished in mid blue carpet (or alternative exhibition quality carpet colour) with a protective covering laid until the opening of the event.

Lighting is provided by downlights – with an output of a minimum of 100w per 3sq.m. located in the light beam.

Individual Booth Specification based on multiples of 9 sq.m.

- Name board
- 1 lockable counter or plinth
- 1 x 5 amp socket (1000w) (for charging laptops, mobiles).
- 1 table and 4 chairs

Other items included

- Layout Plans prepared for Group Stands (once layout has been agreed by BEAMA)
- English speaking Project Manager
- Maintenance Staff on site for the duration of the show
- Submission of Plans to the Organiser for approvals
- Ordering of power for lighting and power requirements (provided that final number of exhibitors is available to us before the power order deadline)
- Power consumption for lighting and mains power as specified in the schedule.
